Supply Chain Highlights

Roundtable on Sustainable Palm Oil (RSPO) Certified – Supply Chain Mass Balance.

Science-Based Targets committing us to a 30% intensity reduction (per 1,000 kg of product) of supply chain greenhouse gas emissions (Scope 3) by 2030.

Partnered with our ingredient suppliers for all-natural ingredients and preservatives for our products.

Partnered with our suppliers to become the largest producer of Raised Without Antibiotics (RWA) pork in North America and poultry in Canada.

The Maple Leaf Centre for Action on Food Security partners with our suppliers across Canada to advance food security.

Reduced nearly 10,000 tonnes of GHG emissions since 2011 by using intermodal transportation and pallet reuse and recycling to eliminate waste and transport products more efficiently.

Partnered with our packaging suppliers to focus on material reduction, post-consumer recycled content, alternative materials and consumer education.

We participate in several industry associations with our retail and food service customers to exchange information, advocate and make our food value chain more sustainable.
