INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Maple Leaf Foods Inc.

Opinion

We have audited the consolidated financial statements of Maple Leaf Foods Inc. (the Entity), which comprise:

- the consolidated balance sheets as at December 31, 2025 and December 31, 2024
- the consolidated statements of earnings for the years then ended
- the consolidated statements of other comprehensive income (loss) for the years then ended
- the consolidated statements of changes in total equity for the years then ended
- the consolidated statements of cash flows for the years then ended
- and notes to the consolidated financial statements, including a summary of material accounting policy information

(Hereinafter referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated financial position of the Entity as at December 31, 2025 and December 31, 2024, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the “***Auditor’s Responsibilities for the Audit of the Financial Statements***” section of our auditor’s report.

We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the year ended December 31, 2025. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined the matters described below to be the key audit matters to be communicated in our auditor's report.

Disposal of Pork Operations: Assessment of Loss of Control and Fair Value of the Pork Operations Equity

Description of the matter

We draw your attention to Notes 2(d), 3(a), 3(d), 9, 22 and 28 to the financial statements. On October 1, 2025, the Entity completed the spin-off of its pork operations, resulting in a loss of control. Accordingly, the results of the pork operations have been presented as discontinued operations for the period up to the date of the spin-off. The Entity recognized a gain, net of transaction costs, of \$428,879 thousand within earnings from discontinued operations. The distribution was recorded using the fair value of net assets comprised of a retained investment of \$113,646 thousand, and a distribution to shareholders of \$596,643 thousand, with the gain calculated based on carrying value of the net assets distributed.

Why the matter is a key audit matter

We identified the evaluation of the disposal of the pork operations and the fair value of the pork operations equity as a key audit matter. Management was required to assess whether the Entity lost control of the pork operations under IFRS 10 Consolidated Financial Statements, which involved evaluating whether the Entity is exposed to or has rights to variable returns from its involvement with the pork operations and has the ability to affect those returns through its power over the pork operations. In addition, determining the gain on disposal required management to estimate the fair value of the pork operations equity, including the retained equity interest, which involved valuation techniques and significant assumptions that are sensitive to future performance and market conditions. Due to the significance of the transaction and the degree of judgment and estimation uncertainty involved, we considered this matter to be a key audit matter.

How the matter was addressed in the audit

The primary procedures we performed to address this key audit matter included the following:

We evaluated the Entity's assessment of control over the pork operations by inspecting Management's accounting analysis of the transaction. We read the transaction agreements, governance rights agreements, and other legal arrangements related to the transaction against the criteria in IFRS 10.

We evaluated the appropriateness of forecasts provided by the Entity by comparing them to actual historical results of the pork operations.

We involved valuation professionals with specialized skills and knowledge, who assisted in assessing management's expert's valuation methodology, discount rate and terminal growth rates used in the determination of the fair value of the pork operations equity. The procedures performed include the following:

- Assessing the Entity's discount rates against discount rate ranges that were independently developed using publicly available market and industry data, and consideration of trading metrics of comparable entities.
- Evaluating the terminal growth rates by considering the growth profile and overall macroeconomic conditions of the pork operations.

Evaluation of impairment of Indefinite life and Definite life Intangible Assets of the Plant Protein Cash Generating Unit ("CGU")

Description of the matter

We draw attention to Notes 2(d), 3(j), 3(o) and 14 to the financial statements. The Entity performs impairment testing annually for indefinite life intangible assets and, when circumstances indicate that there may be impairment for both indefinite life and definite life intangibles. During the year, the Entity recognized impairment charges within the Plant Protein CGU of \$38,400 thousand and \$46,600 thousand related to the indefinite life and definite life intangible assets, respectively. This was a result of a sustained decline in demand in the plant protein market with North America, leading to a significant decrease in the expected future cash flow from the Plant Protein CGU.

The measurement of the recoverable amount of the Plant Protein CGU including the related intangible assets was calculated based on fair value less costs to sell. Fair value was determined by discounting the future cash flows generated from the continuing use of the Plant Protein CGU and the related intangible assets. The Entity measured the recoverable amount of the indefinite life intangible asset using fair value less cost to sell determined by a relief from royalty. The determination of the recoverable amount involved significant estimation uncertainty and judgment, including assumptions related to:

- cash inflows;
- cash outflows;
- terminal growth rate;
- discount rate; and
- royalty rates in respect of indefinite life intangible assets.

Why the matter is a key audit matter

We identified the evaluation of impairment of the indefinite and definite life intangible assets for the Plant Protein CGU as a key audit matter. This matter required a high degree of auditor's subjectivity and judgment in assessing the assumptions used to determine the recoverable amount. Significant auditor judgment and the involvement of professionals with specialized skills and knowledge was required to evaluate the evidence supporting the Entity's significant assumptions.

How the matter was addressed in the audit

The primary procedures we performed to address this key audit matter included the following:

We evaluated the appropriateness of the Entity's future cash inflows by comparing them to actual historical results, adjusted for any changes in macroeconomic factors and trends that impact pricing and volume.

We evaluated the appropriateness of the cash outflows by comparing to the Entity's strategic plan and outlook for margins and expenses.

We involved valuation professionals with specialized skills and knowledge, who assisted in assessing the discount rate, terminal growth rate and royalty rates used in the recoverable amounts. The procedures performed included the following:

Assessed the Entity's discount rate against discount rate ranges that were independently developed using publicly available market and industry data, and consideration of trading metrics of comparable entities.

Evaluated the terminal growth rate by considering the growth profile and overall macroeconomic conditions of the Plant Protein CGU including the indefinite life intangible asset.

Assessed the royalty rates against profitability metrics and independent industry benchmarks.

Other Information

Management is responsible for the other information. Other information comprises:

- the information included in Management's Discussion and Analysis.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit and remain alert for indications that the other information appears to be materially misstated.

We obtained the information included in Management's Discussion and Analysis as at the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in the auditor's report.

We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Entity's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the group audit. We remain solely responsible for our audit opinion.
- Determine, from the matters communicated with those charged with governance, those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes to the Consolidated Financial Statements

(Tabular amounts in thousands of Canadian dollars unless otherwise indicated)

Years ended December 31, 2025 and 2024

1. THE COMPANY

Maple Leaf Foods Inc. ("Maple Leaf Foods" or the "Company") is a leading, protein-focused consumer packaged goods company headquartered in Mississauga, Ontario. It proudly produces responsibly-made, delicious food under powerhouse brands that include Maple Leaf®, Maple Leaf Prime®, Maple Leaf Natural Selections®, Maple Leaf Mighty Protein™, Musafir™, Schneiders®, Mina® Halal, Greenfield Natural Meat Co.®, LightLife® and Field Roast®. The address of the Company's registered office is 6897 Financial Dr., Mississauga, Ontario, L5N 0A8, Canada. The Company's 2025 audited consolidated financial statements ("Consolidated Financial Statements") as at and for the year ended December 31, 2025 include the accounts of the Company and its subsidiaries. The composition of the Company is further described in Note 27.

On October 1, 2025 the Company completed the spin-off of its pork operations, which have been presented as discontinued operations in the Consolidated Statement of Earnings as required under IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB"). More information regarding the spin-off can be found in the Company's Management Information Circular dated May 1, 2025.

2. BASIS OF PREPARATION

(a) Statement of Compliance

The Consolidated Financial Statements have been prepared in accordance with IFRS Accounting Standards as issued by the IASB and using the accounting policies described herein.

The Consolidated Financial Statements were authorized for issue by the Board of Directors on March 5, 2026.

(b) Basis of Measurement

The Consolidated Financial Statements have been prepared on a going concern basis under the historical cost method except for certain assets and liabilities which are measured at fair value. Liabilities associated with employee benefits are stated at actuarially determined present values.

(c) Functional and Presentation Currency

The Consolidated Financial Statements are presented in Canadian dollars, which is the Company's functional currency.

(d) Use of Estimates and Judgements

The preparation of the Consolidated Financial Statements in accordance with IFRS requires Management to make judgements, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, equity, income, and expenses. Actual amounts may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Judgements included in the Consolidated Financial Statements are decisions made by Management, based on analysis of relevant information available at the time the decision is made. Judgements relate to the application of accounting policies and decisions applied to the measurement, recognition, and disclosure of financial information.

Information about areas of estimation uncertainty and critical judgements in applying accounting policies, that have a material effect on the amounts recognized in the Consolidated Financial Statements, are included both below and in the statement notes relating to items subject to significant estimation uncertainty and critical judgements

Long-Lived Assets Valuation

The Company performs impairment testing annually for goodwill and indefinite life intangible assets. Goodwill, indefinite life intangibles, other long-lived assets and definite life intangibles are also tested for impairment when circumstances indicate that there may be impairment. Management judgement is involved in determining if there are circumstances indicating that testing for impairment is required, and in identifying Cash Generating Units ("CGUs") for the purpose of impairment testing.

The Company assesses impairment by comparing the recoverable amount of a long-lived asset, CGU, or CGU group to its carrying value. The recoverable amount is defined as the higher of: (i) value in use; or (ii) fair value less cost to sell.

The determination of the recoverable amount involves significant assumptions, including those with respect to future cash inflows and outflows, discount rates, terminal growth rates, royalty rates with respect to indefinite life intangible assets, and asset lives. These assumptions could affect the Company's future results if the current estimates of future performance and fair values change. These determinations will affect the amount of amortization expense on definite life assets recognized in future periods.

Revaluation of Investment Properties

The Company carries its investment properties at fair value, with changes in fair value being recognized in the Statement of Earnings. Fair value is determined based on available market evidence. If the market evidence is not readily available in less active markets, the Company uses alternative valuation methods such as recent transaction prices or anticipated cash flows. The Company also engages an independent valuation specialist to assess fair value of the investment properties from time to time as required. The determination of fair value includes significant estimation and judgement in comparing market evidence to specific properties. To the extent that estimates differ from amounts realized earnings, comprehensive income, and investment property values will be affected in future periods.

Measurement of Fair Values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. When the measurement of fair values cannot be determined based on quoted prices in active markets, fair value is measured using valuation techniques and models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of estimation is required in establishing fair values. To the extent that these estimates differ from those realized, the measured asset or liability, earnings, and/or comprehensive income will be affected in future periods. Changes in assumptions about the inputs to these models could affect the reported fair value of the Company's financial and non-financial assets and liabilities.

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in Notes 6, 9, 10, 11, 13, 14, 20, and 24.

Nature of Interests in Other Entities

Management applies significant judgement in assessing the nature of its interest in unconsolidated structured entities relating to its accounts receivable securitization facilities. The Company does not hold any equity interest in the structured entities and based on the terms of the agreements under which the entities are established, the Company does not receive the returns related to their operations and is exposed to limited recourse with respect to losses. Information about the nature of interest in other entities is disclosed in Note 27.

Valuation of Inventories

Management makes estimates of the future customer demand for products when establishing appropriate provisions for inventory. In making these estimates, Management considers the product life of inventory and the profitability of recent sales. Code or "best before" dates are very important in the determination of net realizable value of inventory. Management ensures that systems are in place to highlight and properly value inventory that may be approaching code dates. To the extent that actual losses on inventory differ from those estimated, inventory, earnings, and comprehensive income will be affected in future periods.

Trade Merchandise Allowances and Other Trade Discounts

The Company provides for estimated payments to customers based on various trade programs and contracts that often include payments that are contingent upon attainment of specified sales volumes. Significant estimates used to determine these liabilities include: the projected level of sales volume for the relevant period, customer contracted rates for allowances, discounts, and rebates. These arrangements are complex and affect a significant number of customers and products. Management has systems and processes in place to estimate and value these obligations. To the extent that payments on trade discounts differ from estimates of the related liability, accounts payable and accruals, earnings, and comprehensive income will be affected in future periods.

Employee Benefit Plans

The cost of pensions and other post-retirement benefits earned by employees is actuarially determined using the projected unit credit method prorated on service, and Management's best estimate of salary escalation and mortality rates. Discount rates used in actuarial calculations are based on long-term interest rates and can have a material effect on the amount of plan liabilities and expenses. Management employs external experts to advise the Company when deciding upon the appropriate estimates to use in valuing employee benefit plan obligations and expenses. The Company's plans invest in pooled funds which hold underlying equity, debt and other securities that are not quoted in an active market. Management relies on external experts to value these pooled funds. To the extent that these estimates differ from those realized, employee benefit plan assets and liabilities and comprehensive income will be affected in future periods.

Income Taxes

Provisions for income taxes are based on domestic and international statutory income tax rates and the amount of income earned in the jurisdictions in which the Company operates. Significant judgement is required in determining income tax provisions and the recoverability of deferred tax assets. The calculation of current and deferred income tax balances requires Management to make judgements regarding the carrying values of assets and liabilities that include estimates of future cash flows and earnings related to such assets and liabilities, the interpretation of income tax legislation in the jurisdictions in which the Company operates, and the timing of reversal of temporary differences. The Company establishes additional provisions for income taxes when, despite Management's opinion that the Company's tax positions are fully supportable, there is sufficient complexity or uncertainty in the application of

legislation that certain tax positions may be reassessed by tax authorities. The Company adjusts these additional accruals in light of changing facts and circumstances. To the extent that these adjustments differ from original estimates, deferred tax assets and liabilities, earnings, and comprehensive income will be affected in future periods.

Provisions

The Company evaluates all provisions at each reporting date. These provisions can be significant and are prepared using estimates of the costs of future activities. In certain instances, Management may determine that these provisions are no longer required or that certain provisions are insufficient as new events occur or as additional information is obtained. Provisions are separately identified and disclosed in the Consolidated Financial Statements. Changes to these estimates may affect the value of provisions, earnings, and comprehensive income in future periods.

Share-Based Compensation

The Company uses estimates in the calculation of the liability and expenses for certain share-based incentive plans including, but not limited to, estimates of forfeitures, share price volatility, future dividends, future share price, expected life of the award, and Company performance. These estimates are based on previous experience and may change throughout the life of an incentive plan. Such changes could impact the carrying value of contributed surplus, liabilities, earnings, and comprehensive income in future periods.

Some of the Company's share-based payment plans may be settled in either cash or equity instruments. Management uses judgement in determining the appropriate accounting treatment for these plans, based on expectations and historical settlement decisions. Changes to accounting treatment based on Management's judgement may impact contributed surplus, liabilities, earnings, and comprehensive income in future periods.

Depreciation and Amortization

The Company's property and equipment and definite life intangible assets are depreciated and amortized on a straight-line basis, considering the estimated useful lives of the assets and residual values. Right-of-use ("ROU") assets are depreciated on a straight-line basis, considering the shorter of the useful life of the underlying asset or the lease term. If it is reasonably certain at the commencement of the lease arrangement that the Company will exercise its purchase option or otherwise obtain ownership of the underlying asset at the end of the lease term, the ROU asset is depreciated over its useful life. Changes to these estimates may affect the carrying value of these assets, earnings, and comprehensive income in future periods.

Investments

The Company analyzes its private equity investment holdings for changes in fair value at each reporting period. The Company uses significant judgement in reviewing internally and externally available financial information to determine if there are indicators that the fair value of the holdings have changed. Changes to the estimated fair value may affect the value of investment assets, and comprehensive income in future periods. The Company also exercises significant judgement over whether an equity investment is an investment in associate and whether or not the Company has control over the associate. In determining whether the Company has retained control, it evaluates whether it has the power over the relevant activities, exposure or rights to variable returns, and the ability to use its power to affect those returns. An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

Leases

The Company applies significant judgement in assessing whether a contract is or contains a lease. Such judgements include the determination of whether an asset or assets are specifically or implicitly identified in the contract, if the Company has the right to obtain substantially all the economic benefits from use of the asset or assets and whether the Company has the right to direct the use of the asset or assets. These judgements are made at the inception of a contract and may change if there are material changes to the agreement.

Estimates are used to determine the incremental borrowing rate of a lease when the interest rate implicit to the lease is not readily available. The Company's incremental borrowing rate is determined using a model which incorporates the Company's credit worthiness, the nature and quality of the underlying asset, geographic environments and the duration of the lease. The inputs used in determining the incremental borrowing rate are reviewed and updated quarterly. Changes to these estimates may affect the value of assets, liabilities, and earnings in future periods.

The Company also applies significant judgement in determining whether it is reasonably certain to exercise lease extension options or purchase options in a contract by considering all relevant factors and circumstances that may create an economic incentive for the Company to exercise the option considering such factors as past experience, the terms and conditions of the contract, and the importance of the underlying assets to the Company's operations.

Biological Assets

Biological assets are measured at each reporting date, at fair value less costs to sell, except when fair value cannot be reliably measured. If fair value cannot be reliably measured, biological assets are measured at cost less depreciation and impairment losses.

Although a reliable measure of fair value may not be available at the point of initial recognition, it may subsequently become available. In such circumstances, biological assets are measured at fair value less costs to sell from the point at which the reliable measure of fair value becomes available. Gains and losses that arise on measuring biological assets at fair value less costs to sell are recognized in the Consolidated Statements of Earnings in the period in which they arise. Costs to sell include all costs that would be necessary to sell the biological assets, including costs necessary to get the biological assets to market. Management uses estimates over the future price per hog, foreign exchange rates, and estimated weight and cost of hogs at maturity in the determination of fair value. To the extent that actual values differ from estimates, biological assets, earnings and comprehensive income will be affected in future periods.

3. MATERIAL ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these Consolidated Financial Statements.

(a) Principles of Consolidation

These Consolidated Financial Statements include the accounts of the Company and its subsidiaries from the date that control commences until the date that control ceases. Control exists when the Company is exposed to or has rights to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

All intercompany accounts and transactions have been eliminated on consolidation.

(b) Goodwill

Goodwill is measured as the excess of the sum of the fair value of the consideration transferred in a business combination, the amount of any non-controlling interests in the acquiree, and the fair value of any previously held equity interest in the acquiree over the net of the acquisition date fair value of the identifiable assets acquired and the liabilities assumed. If the excess is negative, a bargain purchase gain is recognized immediately in earnings. Transaction costs, other than those associated with the issue of debt or equity, are recognized in earnings as incurred.

Goodwill is not amortized and is tested for impairment annually in the fourth quarter and as required when circumstances indicate that its carrying amount may not be recoverable. Goodwill is tested for impairment at the CGU group level by comparing the carrying amount to its recoverable amount, consistent with the methodology outlined in Note 3 (j).

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured, and settlement is accounted for in equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognized in earnings.

(c) Fair Value Measurements

The Company measures certain financial and non-financial assets and liabilities at fair value at each balance sheet date. In addition, fair value measurements are disclosed for certain financial and non-financial assets and liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and disclosure purposes is determined on such a basis, except for share-based payment transactions, and measurements that have some similarities to fair value but are not fair value, such as net realizable value or value in use.

Assets and liabilities, for which fair value is measured or disclosed in the consolidated financial statements, are classified using a three-level fair value hierarchy that reflects the significance and transparency of the inputs used in making the fair value measurements. Each level is based on the following:

Level 1 - inputs are unadjusted quoted prices of identical assets or liabilities in active markets

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 - one or more significant inputs used in a valuation technique are unobservable in determining fair values of the asset or liability

Determination of fair value and the resulting hierarchy requires the use of observable market data whenever available. The classification of an asset or liability in the hierarchy is based upon the lowest level of input that is significant to the measurement of fair value.

(d) Non-current Assets, or Disposal Groups Held for Sale or Distribution

The Company classifies non-current assets and disposal groups as held for sale or distribution if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. The criteria for held for sale or distribution classification is regarded as met when a sale or distribution is highly probable, the asset or disposal group is available for immediate

sale or distribution in its present condition, and Management is committed to the sale or distribution, which is expected to be completed within one year from the date of classification. Non-current assets and disposal groups classified as held for sale or distribution are measured at the lower of their carrying amount and fair value less costs to sell. Non-current assets are not depreciated once classified as held for sale. Should an asset no longer meet the definition of held for sale the asset will be accounted for as if it had not been moved to held for sale, and reclassified back to its original line item on the Consolidated Balance Sheets.

(e) Translation of Foreign Currencies

The accounts of the Company are presented in Canadian dollars. Transactions in foreign currencies are translated at the actual rates of exchange. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the Canadian dollar at the exchange rate for that date. Foreign exchange differences arising on translation are recognized in earnings. Non-monetary assets and liabilities that are measured at historical cost are translated using the exchange rate at the date of the transaction.

The financial statements of foreign subsidiaries whose unit of measure is not the Canadian dollar are translated into Canadian dollars using the exchange rate in effect at the period-end for assets and liabilities, and the average exchange rates for the period for revenue, expenses, and cash flows. Foreign exchange differences arising on translation are recognized in accumulated other comprehensive income (loss) in equity.

When a foreign operation is disposed of in its entirety or partially such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. If the Company disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is reattributed to the non-controlling interest. When the Company disposes of only part of an associate or joint venture while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to earnings.

Foreign exchange gains and losses arising from a receivable or payable to a foreign operation, the settlement of which is neither planned nor likely to occur in the foreseeable future and which in substance is considered to form part of the net investment in the foreign operations, are recognized in other comprehensive income (loss) in the cumulative foreign currency translation differences.

(f) Financial Instruments

The Company's financial assets, upon initial recognition, are measured at fair value and are classified as Fair Value through Profit or Loss ("FVTPL"), Fair Value through Other Comprehensive Income ("FVOCI"), or amortized cost. The classification is determined at initial recognition and is dependent on the business model in which a financial asset is managed and the characteristics of the contractual cash flows. Subsequent reclassification may only occur on the first day of the reporting period following a change to the business model. The classification of the Company's financial assets is disclosed in Note 20.

The Company's financial liabilities, upon initial recognition, are measured at fair value and are classified as amortized cost or FVTPL. A financial liability is classified as amortized cost at initial recognition unless it is classified as held-for-trading, is a derivative instrument or is specifically designated as FVTPL. Financial liabilities classified as amortized cost are subsequently measured using the effective interest method while financial liabilities at FVTPL are subsequently measured at fair value with changes in fair value recognized in the Consolidated Statements of Earnings in the period in which such changes arise.

The Company records a loss allowance of expected credit losses for financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance at an amount equal to the lifetime expected credit losses if the credit risk on its financial assets has increased significantly since initial recognition. If credit risk has not significantly increased since initial recognition, the Company measures the loss allowance at an amount equal to the 12-month expected credit losses.

Transaction costs, other than those related to financial instruments classified as fair value through profit or loss, which are expensed as incurred, are capitalized to the carrying amount of the instrument and amortized using the effective interest method.

(g) Hedge Accounting

The Company uses derivatives and other non-derivative financial instruments to manage its exposures to fluctuations in interest rates, foreign exchange rates, and commodity prices.

At the inception of a hedging relationship, the Company designates and formally documents the relationship between the hedging instrument and the hedged item, the risk management objective, and its strategy for undertaking the hedge. The documentation identifies the specific asset, liability, or anticipated cash flows being hedged, the risk that is being hedged, the type of hedging instrument used, and how effectiveness will be assessed.

The Company also formally assesses both at inception and at least quarterly thereafter, whether or not the derivatives that are used in hedging transactions are effective in offsetting the changes attributable to the hedged risks in the fair values or cash flows of the hedged items. If a hedging relationship becomes ineffective, it no longer qualifies for hedge accounting and any subsequent change in the fair value of the hedging instrument is recognized in the Consolidated Statements of Earnings.

When hedge accounting is permitted, the hedging relationship may be designated as a cash flow hedge, a fair value hedge, or a net investment in foreign operation hedge. For most cash flow hedges, the change in fair value of the hedging instrument is recorded, to the extent it is effective, in other comprehensive income (loss) until the hedged item affects earnings. If the cash flow hedge is a forecast

transaction that results in the recognition of a non-financial asset or liability, the Company removes that amount from the cash flow hedge reserve and includes it directly in the initial cost or other carrying amount of the asset or the liability. In a fair value hedge, the change in fair value of the hedging derivative is offset in the Consolidated Statements of Earnings by the change in fair value of the hedged item relating to the hedged risk. For a net investment in a foreign operations hedge, foreign exchange gains and losses on the designated financial instrument are recorded in accumulated other comprehensive income (loss) and are offset by the translation adjustments on the underlying net assets of the foreign operations.

Hedge ineffectiveness is measured and recorded in current period earnings in the Consolidated Statements of Earnings. When either a fair value hedge or cash flow hedge is discontinued, any cumulative adjustment to either the hedged item or other comprehensive income (loss) is recognized in earnings, as the hedged item affects earnings, or when the hedged item is derecognized for a net investment in a foreign operations hedge. If a designated hedge is no longer effective, the associated derivative instrument is subsequently carried at fair value through earnings without any offset from the hedged item.

Derivatives that do not qualify for hedge accounting are carried at fair value on the Consolidated Balance Sheets, and subsequent changes in their fair value are recorded in the Consolidated Statements of Earnings.

(h) Inventories

Inventories are valued at the lower of cost and net realizable value, with cost being determined substantially on a first-in, first-out basis. The cost of inventory includes direct product costs, direct labour, and an allocation of variable and fixed manufacturing overhead, including depreciation. When circumstances that previously caused inventories to have a write-down below cost no longer exist, or when there is clear evidence of an increase in the net realizable value, the amount of a write-down previously recorded is reversed through cost of goods sold.

(i) Biological Assets

Biological assets consist of poultry, eggs and, prior to the disposal of the pork operations, live hogs. For the purposes of valuation, these assets are categorized as either parent stock or commercial stock. Parent stock represents animals held and bred for the purpose of generating commercial stock and to replace parent stock nearing the end of its productive cycle. Commercial stock is held for the purposes of further processing or eventual sale, at which point it becomes inventory. The fair value of commercial stock is determined based on market prices of livestock of similar age, breed, and genetic merit, less costs to sell the assets, including estimated costs necessary to transport the assets to market. Where reliable market prices of parent stock are not available, they are valued at cost less accumulated depreciation and any accumulated impairment losses. No active market exists for parent stock as they are rarely sold. Hog parent stock is depreciated on a straight-line basis over two to three years after considering residual values, whereas poultry parent stock is depreciated on a straight-line basis over six to eight months.

Biological assets are transferred into inventory at fair value less costs to sell at the point of delivery.

(j) Impairment or Disposal of Long-Lived Assets

The Company reviews long-lived assets or asset groups held and used, including property and equipment and intangible assets subject to amortization, for recoverability whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Asset groups referred to as CGUs include an allocation of corporate assets and are reviewed at their lowest level for which identifiable cash inflows are largely independent of cash inflows of other assets or groups of assets. The recoverable amount is the greater of its value in use and its fair value less cost to sell.

Value in use is based on estimates of discounted future cash flows expected to be recovered from a CGU, CGU group or asset through its use. Management develops its cash flow projections based on past performance and its expectations of future market and business developments. Once calculated, the estimated future pre-tax cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Fair value less cost to sell is the amount obtainable from the sale of an asset, CGU or CGU group in an arm's-length transaction between knowledgeable, willing parties, less the costs of disposal. Costs of disposal are incremental costs directly attributable to the disposal of an asset or CGU, excluding financing costs and income tax expense.

An impairment loss is recognized in the Consolidated Statements of Earnings when the carrying amount of any asset, CGU, or CGU group exceeds its estimated recoverable amount. Impairment losses recognized in respect of a CGU or a CGU group are allocated, first to reduce the carrying amount of any goodwill allocated to the CGU or CGU group, and then to reduce the net carrying amount of the other assets in the CGU or CGU group on a pro rata basis.

Impairment losses related to long-lived assets recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortization, if no previous impairment loss had been recognized.

(k) Property and Equipment

Property and equipment, with the exception of land, is recorded at cost less accumulated depreciation and any net accumulated impairment losses. Land is carried at cost and not depreciated. For qualifying assets, cost includes interest capitalized during the construction or development period. Construction-in-process assets are capitalized during construction and depreciation commences when the asset is available for use. Depreciation related to assets used in production is recorded in inventory and cost of goods sold. Depreciation related to non-production assets is recorded through selling, general, and administrative expense ("SG&A"). Depreciation is calculated on a straight-line basis, after taking into account residual values, over the following expected useful lives of the assets:

Buildings, including other components	10-40 years
Machinery and equipment	3-20 years

When parts of an item of property and equipment have different useful lives, those components are accounted for as separate items of property and equipment.

(l) Investments in associates

Investments in associates are accounted for using the equity method. Under the equity method, an investment in an associate is recognized initially in the Consolidated Balance Sheets at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income of the associate. When the Company's share of losses of an associate exceeds the Company's interest in that associate, the Company discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate. Dividends received from an associate are recognized as a reduction to the carrying amount of the investment.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the investment in an associate, any excess of the cost of the investment over the Company's share of the net fair value of the identifiable assets and liabilities of the investee is recognized as goodwill, which is included within the carrying amount of the investment. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognized immediately in profit or loss in the period in which the investment is acquired.

(m) Investment Properties

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in profit or loss in the period in which they arise, including the corresponding tax effect. Fair value is determined based on available market evidence. If market evidence is not readily available in less active markets the Company uses alternative valuation methods such as recent transaction prices or anticipated cash flows.

Investment properties are derecognized either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period of de-recognition.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property, and equipment up to the date of change in use. Gains from the change in fair value at the time a property ceases to be owner-occupied are recorded through Other Comprehensive Income within revaluation surplus prior to the transfer.

(n) Right-of-use ("ROU") Assets and Lease Obligations

At the inception of a contract, the Company assesses if the agreement is or contains a lease. A lease arrangement exists if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Company recognizes a ROU asset and lease obligation with respect to all lease arrangements with a lease term greater than 12 months. Leases with a term of 12 months or less and variable rent expenses are recognized as an expense in the Consolidated Statements of Earnings when performance relating to those expenses has occurred.

The Company measures its lease obligation as the present value of the outstanding lease payments, discounted using the interest rate implicit in the lease and the term of the contract adjusted for reasonably certain renewal or termination options. If the interest rate implicit in the lease is not readily available, the payments are discounted using the Company's incremental borrowing rate. The lease obligation is subsequently measured by increasing the carrying amount for interest using the effective interest method. Lease payments are recognized as reductions to the carrying amount of the lease obligation.

The ROU asset is measured at the amount of the initial lease obligation and adjusted for any lease payments made at or before the commencement date of the lease less any incentives, initial direct costs, or the estimate of costs to restore the ROU asset at the conclusion of the lease term. ROU assets are depreciated on a straight-line basis over the shorter of the useful life of the underlying asset consistent with the Company's depreciation policy for property and equipment as outlined in Note 3 (k), or the lease term. If it is

reasonably certain at the commencement of the lease arrangement that the Company will exercise its purchase option or otherwise obtain ownership of the underlying asset at the end of the lease term, the ROU asset is depreciated over the useful life of the underlying asset.

The Company remeasures the lease obligation and ROU asset as a result of material modifications to a lease arrangement.

(o) Intangible Assets

Intangible assets include computer software, trademarks, recipes, customer relationships and poultry production quota. Definite life intangible assets are measured at cost less accumulated amortization and any net accumulated impairment losses. Amortization is recognized in the Consolidated Statements of Earnings on a straight-line basis over the estimated useful lives of the following assets:

Computer software	3-10 years
Customer relationships	20-25 years
Recipes	5-20 years

Indefinite life intangibles including trademarks and poultry production quota are tested for impairment annually in the fourth quarter and as required when circumstances indicate that the net carrying value may not be recoverable. Refer to Note 3 (j) for impairment testing methods.

Upon recognition of an intangible asset, the Company determines if the asset has a definite or indefinite life. In making this determination, the Company considers the expected use, expiry of agreements, the nature of the asset, and whether the value of the asset decreases over time.

(p) Employee Benefit Plans

The Company provides post-employment benefits through defined benefit and defined contribution plans.

Defined Benefit Plans

The Company accrues obligations and costs in respect of employee defined benefit plans. The cost of pensions and other retirement benefits earned by employees is actuarially determined using the projected unit credit method prorated on service and Management's best estimate of salary escalation, retirement ages of employees, mortality rates, inflation and expected health care costs. Changes in these assumptions could affect future pension expense. The fair value of plan assets and the present value of the obligation are used to calculate net interest cost or income. The discount rate used to value the defined benefit obligation is based on high-quality corporate bonds in the same currency in which the benefits are expected to be paid and with terms to maturity that, on average, match the terms of the defined benefit obligations. The discount rate used to value the current service cost is based on high-quality corporate bonds in the same currency in which the employer contributions are expected to be made in and with terms of maturity that, on average, match the expected remaining service period for active employees.

Actuarial gains and losses due to changes in defined benefit plan assets and obligations are recognized immediately in accumulated other comprehensive income (loss).

When the calculation results in a net benefit asset, the recognized asset is limited to the total of any unrecognized past service costs and the present value of economic benefits available in the form of future refunds from the plan or reductions in future contributions to the plan (the "asset ceiling"). To calculate the present value of economic benefits, consideration is given to minimum funding requirements that apply to the plan. Where it is anticipated that the Company will not be able to recover the value of the net defined benefit asset, after considering minimum funding requirements for future services, the net defined benefit asset is reduced to the amount of the asset ceiling. The impact of the asset ceiling is recognized in other comprehensive income (loss).

When future payment of minimum funding requirements related to past service would result in a net defined benefit asset "surplus" or an increase in a surplus, the minimum funding requirements are recognized as a liability, to the extent that the surplus would not be fully available as a refund or a reduction in future contributions. Re-measurement of this liability is recognized in other comprehensive income (loss) in the period in which the re-measurement occurs.

Defined Contribution Plans

The Company's obligations for contributions to employee defined contribution pension plans are recognized in the Consolidated Statements of Earnings in the periods during which services are rendered by employees.

Multi-Employer Plans

The Company participates in multi-employer pension plans which are accounted for as defined contribution plans. The Company does not administer these plans as the administration and the investment of these assets are controlled by a board of trustees consisting of union and employer representatives. The Company's responsibility to make contributions to these plans is established pursuant to collective bargaining agreements. The contributions made by the Company to the multi-employer plans are expensed when due.

(q) Share-Based Compensation

The Company applies the fair value method of accounting for share-based compensation. The fair value at grant date of stock options is estimated using the Black-Scholes option-pricing model. The fair value of restricted share units ("RSUs"), including performance share units ("PSUs"), is measured based on the fair value of the underlying shares on the grant date and expected achievement of performance conditions. Compensation cost is recognized on a straight-line basis over the expected vesting period of the share-based compensation. The Company estimates the number of units expected to vest at the grant date and revises the estimate as necessary if subsequent information indicates that the actual number of units vesting differs significantly from the original estimate. The fair value of deferred share units ("DSUs") is measured based on the fair value of the underlying shares at grant date.

The Company has share-based compensation plans which are able to be settled in either cash or equity instruments at the option of the Company. Each grant is accounted for based on the expected settlement method at the time of issue. The expectation is re-evaluated at the end of each reporting period.

(r) Revenue Recognition

The majority of the Company's revenue is derived from the sale of products to retail and foodservice customers, as well as the sale of by-products to industrial and agricultural customers. The Company recognizes revenue for all sales at the fair value of the consideration received or receivable. Sales are net of a provision for variable consideration of estimated allowances and sales incentives provided to customers, such that it is highly probable that a significant reversal will not occur once the uncertainty related to the variable consideration is subsequently resolved. For all transactions, revenue is recognized when control of the goods has transferred, being at the point the customer receives and accepts the product. The customer may receive product either through delivery or by pick-up. There are no significant financing components associated with the Company's payment terms.

The Company generally does not accept returns of spoiled products from customers. For product that may not be returned, the Company, in certain cases, provides customers with allowances to cover any damage or spoilage, and such allowances are deducted from sales at the time of revenue recognition.

The value of sales incentives provided to customers are estimated using historical trends and are recognized at the time of sale as a reduction of revenue. Sales incentives include rebate and promotional programs provided to the Company's customers. These rebates are based on achievement of specified volume or growth in volume levels and other agreed promotional activities. In subsequent periods, the Company monitors the performance of customers against agreed upon obligations related to sales incentive programs and makes any adjustments to both revenue and sales incentive accruals as required.

The Company enters into repurchase agreements, which represent sales to third parties where the Company is required to buy-back the asset sold or a good containing that asset as a component. These sales and their associated cost of goods sold are not recognized in the Consolidated Statements of Earnings until their eventual third-party sale.

(s) Borrowing Costs

Borrowing costs are primarily comprised of interest on the Company's indebtedness. Borrowing costs are capitalized when they are attributable to the acquisition, construction, or production of a qualifying asset. The Company defines qualifying assets as any asset that requires more than six months to prepare for its intended use. Borrowing costs attributable to qualifying assets are calculated using the Company's average borrowing cost excluding the costs associated with the derecognition of accounts receivables under securitization programs. Borrowing costs that are not attributable to a qualifying asset are expensed in the period in which they are incurred and reported within interest expense in the Consolidated Statements of Earnings.

(t) Government Incentives

Government incentives are not recognized until there is reasonable assurance that they will be received and that the Company will be in compliance with any conditions associated with the incentives. Incentives that compensate the Company for expenses or losses are recognized in earnings with the same classification as the related expense or loss in the same periods in which the expenses or losses are recognized.

Government incentives received with the primary condition that the Company should purchase, construct, or otherwise acquire non-current assets are recognized as a deduction from the associated asset on the Consolidated Balance Sheets. The incentive is recognized in earnings over the useful life of the asset as a reduction of the related depreciation expense.

Government incentives that are receivable as compensation for expenses or losses already incurred, or for the purpose of giving immediate financial support to the Company with no future related costs, are recognized in earnings in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government incentive, and is measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

(u) Income Taxes

Income tax expense is comprised of current and deferred tax. Income tax is recognized in the Consolidated Statements of Earnings, except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income (loss).

Current tax expense represents the amount of income taxes payable, in respect of the taxable profit for the period, based on tax law that is enacted or substantially enacted at the reporting date, and is adjusted for changes in estimates of tax expense recognized in prior periods. A current tax liability or asset is recognized for income tax payable, or paid but recoverable in respect of all periods to date.

The Company uses the asset and liability method of accounting for income taxes. Accordingly, deferred tax assets and liabilities are recognized for the deferred tax consequences attributable to differences between the carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in the years when those temporary differences are expected to be recovered or settled and in the manner in which those temporary differences are expected to be recovered or settled through sale or continued use. In addition, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in both earnings and comprehensive income in the period in which the enactment or substantive enactment takes place.

A deferred tax asset is recognized for unused tax losses, tax credits, and deductible temporary differences, to the extent that it is probable that future taxable income will be available to utilize such amounts. Deferred tax assets are reviewed at each reporting date and are adjusted to the extent that it is no longer probable that the related tax benefits will be realized.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Deferred tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

(v) Accounting Pronouncements Issued But Not Yet Effective*Presentation and Disclosure in Financial Statements- IFRS 18*

On April 9, 2024, the IASB issued IFRS 18 *Presentation and Disclosure in Financial Statements* to improve reporting of financial performance. IFRS 18 replaces IAS 1 *Presentation of Financial Statements*. It carries forward many requirements from IAS 1 unchanged and introduces significant changes to the structure of a company's income statement, more discipline and transparency in presentation of management's own performance measures, commonly referred to as 'non-GAAP measures', and less aggregation of items into large, single numbers. IFRS 18 applies for annual reporting periods beginning on or after January 1, 2027 with the requirement of retrospective restatement. Earlier application is permitted. The Company currently intends to adopt this amendment in its Consolidated Interim Financial Statements for the period beginning January 1, 2027. The Company has yet to assess the impact of adoption on the Consolidated Financial Statements.

All other IFRSs and amendments issued but not yet effective have been assessed by the Company and are not expected to have a material impact on the Consolidated Financial Statements.

4. ACCOUNTS RECEIVABLE

	As at December 31,	
	2025	2024
Trade receivables	\$ 106,858	\$ 130,409
Less: Allowance for doubtful accounts	(1,610)	(2,119)
Net trade receivables	\$ 105,248	\$ 128,290
Other receivables:		
Commodity taxes receivable	15,064	13,911
Government receivable	3,283	11,096
Other	15,480	17,622
	\$ 139,075	\$ 170,919

The aging of trade receivables is as follows:

	As at December 31,	
	2025	2024
Current	\$ 74,091	\$ 97,968
Past due 0-30 days	24,312	23,640
Past due 31-60 days	4,925	2,578
Past due > 60 days	3,530	6,223
	\$ 106,858	\$ 130,409

Trade receivables are impaired when their estimated future cash flows are less than their contractual cash flows. The amount of impairment takes into account the financial condition of the customers, delinquencies in payments, collaterals and credit insurance coverage on the trade receivables.

The Company has sold certain of its trade accounts receivables under a securitization program as described in Note 27. The securitization program requires the sale of trade receivables to be treated as a sale from an accounting perspective and as a result, trade receivables sold under this program are derecognized from the Consolidated Balance Sheets as at December 31, 2025 and 2024.

5. INVENTORIES

	As at December 31,	
	2025	2024
Raw materials	\$ 61,185	\$ 60,552
Work in process	38,391	46,926
Finished goods	250,149	319,529
Packaging	34,738	32,893
Spare parts	87,833	93,498
	\$ 472,296	\$ 553,398

For the year ended December 31, 2025, inventory in the amount of \$3,057.9 million (2024: \$2,879.2 million - restated to exclude discontinued operations) was expensed through cost of goods sold.

For the year ended December 31, 2025, inventories have been reduced by \$9.0 million (December 31, 2024: \$16.2 million) as a result of write-downs to net realizable value. The write-downs are included in the amount expensed through cost of goods sold.

6. BIOLOGICAL ASSETS

	Hog stock		Poultry stock		Total
	Commercial	Parent	Commercial	Parent	
Balance at December 31, 2024	\$ 124,356	34,547	6,100	4,396	\$ 169,399

Change in fair value unrealized	15,984	—	—	—	15,984
Further processing and sales	(330,672)	—	(79,394)	—	(410,066)
Disposal of pork operations (Note 22)	(122,669)	(32,496)	—	—	(155,165)
Balance at December 31, 2025	\$ —	—	6,428	4,493	\$ 10,921

	Hog stock		Poultry stock		Total
	Commercial	Parent	Commercial	Parent	
Balance at December 31, 2023	\$ 69,048	36,054	5,930	3,885	\$ 114,917
Additions and purchases	433,759	8,620	77,626	5,922	525,927
Depreciation	—	(10,127)	—	(5,411)	(15,538)
Change in fair value realized	51,039	—	—	—	51,039
Change in fair value unrealized	12,543	—	—	—	12,543
Further processing and sales	(442,033)	—	(77,456)	—	(519,489)
Balance at December 31, 2024	\$ 124,356	34,547	6,100	4,396	\$ 169,399

Hog stock was comprised of approximately 0.9 million animals as at December 31, 2024. All of the Company's hog stock, approximately 1.0 million animals as at October 1, 2025, was disposed of as part of the spin-off of the Company's pork operations. During the periods prior to the spin-off transaction, substantially all hog stock was directly transferred to the Company's primary processing operations.

Poultry stock is comprised of approximately 8.7 million eggs and 0.2 million birds as at December 31, 2025 (2024: 8.6 million eggs and 0.2 million birds). Substantially all poultry stock was directly transferred to the Company's primary processing operations.

The change in fair value of commercial hog stock for the year was a gain of \$3.4 million for the year ended December 31, 2025 (2024: \$63.6 million) recorded in earnings from discontinued operations.

The fair value measures of commercial hog stock have been categorized as a Level 3 fair value based on inputs to the valuation techniques used. There were no transfers between levels for the year ended December 31, 2025.

The Company uses the market comparison approach to determine the fair value of its commercial hog stock. The valuation model is based on the market price of hog stock of similar age, weight, breed, and genetic make-up. The model is based on the U.S. dollar market price per cut weight and adjusted for foreign exchange, conversion from pounds to kilograms, and specific significant unobservable inputs, including a quality index adjustment and a market conversion factor, as defined below.

The quality index adjustment is a value adjustment based on the relative quality of a processed hog based on the lean yield (being the ratio between muscle and fat content) and total weight. Quality adjustments during the year ranged from 6.8% to 7.1% (2024: 6.7% to 7.1%). A higher (lower) quality adjustment percentage will result in an increase (decrease) to the fair market value of the commercial hog stock.

The market conversion factor is a market adjustment used to discount the formula from a U.S. market price to a Canadian pricing model. The market conversion factor experiences minimal fluctuation. A higher (lower) market conversion factor will result in an increase (decrease) to the fair market value of the commercial hog stock.

Commercial poultry stock are valued at cost as an indicator of fair value in the case where little biological transformation has taken place since initial cost occurrence or when the impact of the biological transformation on price is not expected to be material.

Where reliable market prices of parent stock are not available, they are valued at cost less accumulated depreciation and any accumulated impairment losses. No active liquid market exists for parent stock as they are rarely sold.

The Company's biological asset operations can be affected by outbreaks of disease among livestock. To mitigate this risk, the Company monitors herd health status and has strict bio-security procedures and employee training programs throughout its livestock production operation.

7. PROPERTY AND EQUIPMENT

	Land	Buildings	Machinery and equipment	Under construction	Total
Cost	\$ 41,150	1,503,303	1,679,668	54,000	\$ 3,278,121

Net balance, December 31, 2024	\$57,064	1,302,976	714,915	48,212	\$ 2,123,167

⁽ⁱ⁾ During the year the Company settled previous legal claims resulting in cash settlements.

⁽ⁱⁱ⁾ Includes disposals and other adjustments.

Borrowing Costs

For the year ended December 31, 2025, borrowing costs of \$1.0 million were capitalized (2024: \$1.0 million), using an average capitalization rate of 5.7% (2024: 7.5%).

8. RIGHT-OF-USE ASSETS

The Company enters into lease arrangements for land, buildings, vehicles, and machinery and equipment as part of its daily operations.

Land and building leases include the rental of office space, manufacturing and distribution facilities and barns. These leases vary in length, are typically over 5 years and may include several renewal options.

Vehicle leases primarily include leases of employee vehicles. Employee vehicle leases have an initial term of 3 years. As part of its leasing agreement for employee vehicles, the Company is required to pay a residual value guarantee to the lessor for the value of the leased vehicle at the end of the lease term. As at December 31, 2025, the Company's residual value guarantees on employee vehicles totaled \$3.0 million (2024: \$4.2 million).

Machinery and equipment leases include the rental of manufacturing machinery and computer hardware. These leases vary in duration and structure and typically do not exceed 10 years.

Right-of-use assets are comprised of:

	Land and Buildings	Vehicles	Machinery and Equipment	Total
Cost	\$ 142,098	8,560	3,320	\$ 153,978
Accumulated depreciation	(76,564)	(3,685)	(2,547)	(82,796)
Net balance, December 31, 2025	\$ 65,534	4,875	773	\$ 71,182

	Land and Buildings	Vehicles	Machinery and Equipment	Total
Cost	\$ 273,907	10,851	6,184	\$ 290,942
Accumulated depreciation	(120,337)	(4,715)	(4,968)	(130,020)
Net balance, December 31, 2024	\$ 153,570	6,136	1,216	\$ 160,922

Changes in the net balance of right-of-use assets during 2025 and 2024 were as follows:

	Land and Buildings	Vehicles	Machinery and Equipment	Total
Net balance, December 31, 2024	\$ 153,570	6,136	1,216	\$ 160,922
Additions	15,961	4,984	199	21,144

Net balance, December 31, 2024	\$ 153,570	6,136	1,216	\$ 160,922

Lease obligations associated with the Company's right-of-use assets are described in Note 17.

9. INVESTMENTS

	As at December 31, 2025	As at December 31, 2024
Investment in associate	\$ 113,595	\$ —
Portfolio investments	8,235	11,983
Other investments	—	780
	\$ 121,830	\$ 12,763

Investment in Associate

On October 1, 2025, the Company completed the spin-off of its pork operations resulting in a loss of control. Following the transaction, the Company's former pork operations form the operations of Canada Packers Inc. ("Canada Packers"), an independent public Canadian company, listed on the TSX. As part of the spin-off the Company retained a 16% equity interest in Canada Packers, and entered into a supply agreement, along with other agreements, with Canada Packers. These agreements serve to provide the Company with access to a stable supply of pork products used in its operations. Further details have been filed on SEDAR+, under Canada Packers' profile.

Although the Company holds less than 20% of the equity shares of Canada Packers, the Company exercises significant influence by virtue of director presence on the board of directors of Canada Packers and material transactions through agreements signed as part of the spin-off. Accordingly, the retained equity interest is accounted for as an investment in associate using the equity method of accounting.

The summarized financial information of Canada Packers and the reconciliation of its net assets to the carrying amount of the Company's investment is as follows:

	As at December 31, 2025
Current assets	\$ 410,357
Non-current assets	513,579
Current liabilities	154,020
Non-current liabilities	497,932
Net assets of the associate	\$ 271,984
The Company's % of equity interest in the associate	16%
The Company's equity interest in the associate	\$ 43,517
Associate's cumulative transactions with other equity holders	55
Fair value adjustment of long-term assets	54,433
Goodwill	15,590
Carrying amount of investment in associate	\$ 113,595

	For the year ended December 31, 2025
Revenue	\$ 429,408
Earnings	\$ 23,167
Other comprehensive income	970
Total comprehensive income	\$ 24,137
Dividends received from the associate	\$ 1,094

The changes in the carrying amount of the investment in associate during 2025 were as follows:

Balance, December 31, 2024	\$	—
Additions		113,646
Share of associate's total comprehensive income		3,862
Amortization of fair value adjustment on long-term assets		(2,819)
Dividend received		(1,094)
Balance, December 31, 2025	\$	113,595

Portfolio Investments

The Company holds strategic long-term equity investments in private companies that are not quoted in an active market. Fair value for these investments is determined using available financial and market information which can include financial statements, company projections and evidence from external transactions in the private company's equity. Changes in fair value for the portfolio investments are recorded in other comprehensive income, as this best represents the Company's position to maintain a long-term interest in these holdings.

During the year ended December 31, 2025, the Company recorded a reduction in fair value of \$3.4 million (2024: \$4.0 million) on its portfolio investments, which was recorded through other comprehensive income.

No dividends were received from the portfolio investments for the years ended December 31, 2025 and 2024.

10. INVESTMENT PROPERTY

	As at December 31, 2025
Net balance, December 31, 2024	\$ 42,588
Transfer from Assets held for sale	20,900
Disposal of pork operations (Note 22)	(6,900)
Transfers from Property and equipment	5,000
Change in fair value	(5,932)
Net balance, December 31, 2025	\$ 55,656

	As at December 31, 2024
Net balance, December 31, 2023	\$ 57,144
Transfers from Property and equipment	6,900
Transfer to Assets held for sale	(22,400)
Change in fair value	944
Net balance, December 31, 2024	\$ 42,588

As at December 31, 2025, the fair values of the properties are based on information received from an accredited independent valuator, using a market comparison approach that reflects recent transaction prices for similar properties in the same geographical areas. In estimating the fair value of properties the highest and best use is considered to be consistent with the current use. The fair value measurement of investment properties have been categorized as a Level 3 fair value based on inputs to the valuation techniques used. There have been no changes to the valuation techniques used during the year, and there have not been any transfers between levels.

The Company's investment properties did not earn a material amount of rental income, nor did they incur a material amount of expenses in either of the current or the prior year.

During the year ended December 31, 2024, the Company transferred its Winnipeg pork manufacturing plant into investment property. The property was accounted for as property and equipment up to the date of change in use and was remeasured to fair value prior to

the transfer to investment property. During the year ended December 31, 2024, a parking lot in Toronto, Ontario which was previously classified as an investment property was remeasured and transferred to asset held for sale, as the Company entered into negotiations with a new potential buyer.

During the year ended December 31, 2025, the parking lot in Toronto, Ontario which was previously classified as an asset held for sale was transferred back to investment property, as the sale was deemed to be no longer probable. During the year ended December 31, 2025, the Company transferred its Brantford poultry plant into investment properties upon its closure. This property was accounted for as property and equipment up to the date of change in use and was remeasured to fair value prior to the transfer to investment property. On October 1, 2025, the Winnipeg pork manufacturing plant was disposed of as part of the spin-off of the Company's pork operations.

11. EMPLOYEE BENEFITS

The Company sponsors defined benefit pension programs for Canadian employees which are either final salary plans, career salary plans, service-based plans, or a combination thereof. The Company also sponsors a final salary defined benefit pension plan in the U.K. in which membership is closed with no members accruing benefits. These defined benefit plans require contributions to be made to separately administered funds. Certain retired employees are covered under a post-retirement benefit plan, which reimburses certain medical costs and provides life insurance coverage.

The Canadian plan is governed by the pension laws of Ontario. The U.K. plan is governed by the employment laws of the U.K.

The Company's pension funding policy is to contribute amounts sufficient, at a minimum, to meet local statutory funding requirements. For the Company's defined benefit pension plans, local regulatory bodies either define minimum funding requirements or approve funding plans submitted by the Company. From time to time the Company may make additional discretionary contributions considering actuarial assessments and other factors. The contributions that have been made to support ongoing plan obligations have been recorded in the respective asset or liability accounts on the Consolidated Balance Sheets. Actuarial valuations for the Company's defined benefit pension plans are completed based on the regulations in place in the jurisdictions where the plans operate.

As part of the spin-off transaction, a separate pension plan was established for the pork operations. This pension plan is effectively responsible for the defined benefit pension obligations related to the employees of pork operations and a prorated portion of the pension assets based on the solvency liabilities attributable to the employees of pork operations. The Company has therefore derecognized a net pension liability of \$1.9 million which represents the fair value of assets and liabilities at the date of spin-off that were part of or will be transferred to the separate plan. These assets and obligations will be fully transferred from the established pension plan pending final regulatory approval.

On December 1, 2025, the pension plan purchased buy-out annuities for approximately 4,200 participants with a premium of \$494.0 million. The buy-out effectively eliminates all further legal or constructive obligations for the portion of the benefits provided under the Company's defined benefit pension plans. As a result of the transaction, the Company recognized a one-time settlement gain of \$35.5 million as other income in the Consolidated Statement of Earnings. The insurer will issue individual policies and begin making monthly pension payments in 2026.

Information about the Company's defined benefit plans as at December 31, in aggregate, are as follows:

	Other post-retirement benefits			Other post-retirement

Settlement gain on buy-out	(35,530)	—
Net pension benefit expense	\$ (9,017)	\$ 26,040

⁽ⁱ⁾ Restated, see Note 22.

⁽ⁱⁱ⁾ Included in restructuring for the year.

For the year ended December 31, 2025, the Company expensed salaries of \$653.5 million (2024: \$646.4 million - restated to exclude discontinued operations), excluding pension and other post-retirement benefits.

Amounts recognized in other comprehensive income (loss) (before income taxes):

	2025	2024
Actuarial gain (loss)	\$ (503)	\$ 2,508

The significant actuarial assumptions adopted in measuring the Company's accrued benefit obligations were as follows:

	2025	2024
Period end discount rate	4.90%	4.60%
Rate of salary increase	2.75%	2.75%

Plan assets were comprised of:

	As at December 31,	
	2025	2024
Equity securities	17%	9%
Debt securities	50%	77%
Real estate and infrastructure	32%	13%
Other investments and cash	1%	1%
	100%	100%

As at December 31, 2025, the Company's plans were invested in pooled funds which hold underlying equity, debt and other securities and are not quoted in an active market.

Other post-retirement benefits expense recognized in earnings:

	2025	2024
Current service cost	\$ 29	\$ 30
Interest cost	1,524	1,592
Other post-retirement benefits expense	\$ 1,553	\$ 1,622

Impact of changes in major assumptions:

Actuarial Assumption	Increase (decrease) in defined benefit obligations					
	Sensitivity		Total pensions	Other post-retirement benefits	Total	
Period end discount rate	4.90 %	0.25 % decrease	\$ 10,719	666	\$ 11,385	
		0.25 % increase	\$ (9,499)	(610)	\$ (10,109)	
Rate of salary increase	2.75 %	0.50 % increase	\$ 1,263	N/A	\$ 1,263	
Mortality	100% of 2014 Private Sector Canadian Pensioners' Mortality Table, projected generationally using Scale MI-2017	Increase of 1 year in expected lifetime of plan participants	\$ 7,315	1,217	\$ 8,532	
Defined benefit obligation inputs:				Measurement dates:		
2025 expense				December 31, 2024		
Balance sheet				December 31, 2025		

The average expected maturity of the pension obligations is 15.4 years (2024: 11.7 years).

The Company expects to contribute \$29.3 million to pension plans in 2026, inclusive of defined benefit plans, defined contribution plans and multi-employer plans.

Governance and Risk Management

The Company administers its pension plans through its Board of Directors. The Company's Board of Directors has established a governance structure and delegated to the Audit Committee and the Pension Investment Advisory Committee all aspects of the investment of the funds. The Company's Board of Directors has delegated to the Pension Policy and Administration Committee the authority to make amendments to the documents that govern the pension plans of an administrative or compliance nature, that relate to collective bargaining agreements entered into by the Company or that have a minimal financial impact on the plans.

In fulfilling their responsibilities, the Audit Committee and the Pension Investment Advisory Committee may delegate functions or responsibilities to, or otherwise utilize employees of the Company where appropriate. The Audit Committee and the Pension Investment Advisory Committee may rely on independent experts for certain aspects of the funds' operations. The Audit Committee or the Pension Investment Advisory Committee, as appropriate, retain responsibility and utilize suitable personnel for such activities and monitor the activities undertaken by the selected personnel.

The plan assets are invested primarily in well-diversified pooled funds that meet the constraints set out in legislation of the jurisdictions in which the plans operate. Further diversification criteria set out in investment funds' governing documents require the division of investments between equities and fixed income. There are no significant concentrations of risks.

Multi-Employer Plan

The Company contributes to the Canadian Commercial Workers Industry Pension Plan which is a multi-employer defined benefit plan for employees who are members of the United Food and Commercial Workers Canada union. This is a large-scale plan for union workers of multiple companies across Canada. Adequate information to account for these contributions as a defined benefit plan in the Company's statements is not available due to the size and number of contributing employers in the plan. Included in the pension benefit expense is \$0.1 million (2024: \$0.2 million) related to payments into this plan. The Company expects to contribute \$0.1 million into this plan in 2026.

12. INCOME TAXES

The components of income tax expense for continuing operations were as follows:

	2025	2024
Current tax (recovery) expense		
Current year	\$ 96,656	\$ (630)
	\$ 96,656	\$ (630)
Deferred tax (recovery) expense		
Origination and reversal of temporary differences	\$ (36,422)	\$ 5,250
Change in tax rates	(600)	(1,050)
	\$ (37,022)	\$ 4,200
Total income tax expense (recovery)	\$ 59,634	\$ 3,570

Reconciliation of Effective Tax rate

Income tax expense on continuing operations varies from the amount that would be computed by applying the combined federal and provincial statutory income tax rates as a result of the following:

	2025	2024
Income tax expense (recovery) according to combined statutory rate of 26.2% (2024: 26.2%)	\$ 27,138	\$ (2,174)
Increase (decrease) in income tax resulting from:		
Unrecognized income tax benefit of losses	5,331	5,737
Derecognition of a portion of deferred tax asset on net operating losses	25,809	—
Non-taxable portion of capital gains	(2,038)	(1,326)
Tax rate differences in other jurisdictions	1,801	787
Manufacturing and processing credit	(1,284)	(102)
Non-deductible expenses and transaction costs	1,392	24
Share-based compensation	1,292	1,639
Remeasurement of deferred tax assets and liabilities	(600)	(1,050)
Adjustment to tax expense of prior years	1,300	(50)
Other	(507)	85
	\$ 59,634	\$ 3,570

Income Tax Recognized in Other Comprehensive Income (Loss) for continuing operations

	2025	2024
Revaluation surplus	\$ 1,200	\$ —
Derivative instruments	1,873	(4,795)
Pension adjustments	(125)	600
	\$ 2,948	\$ (4,195)

The components of income tax expense for discontinued operations were as follows:

	2025	2024
Current tax (recovery) expense		
Current year	\$ 31,058	\$ 14,249
	\$ 31,058	\$ 14,249
Deferred tax (recovery) expense		
Origination and reversal of temporary differences	\$ (555)	\$ 26,451
	\$ (555)	\$ 26,451
Total income tax expense (recovery)	\$ 30,503	\$ 40,700

Income tax recognized in Other Comprehensive Income (Loss) for discontinued operations

	2025	2024
Derivative instruments	\$ 408	\$ (654)
Pension adjustments	(325)	—
	\$ 83	\$ (654)

Deferred Tax Assets and Liabilities

Recognized Deferred Tax Assets and Liabilities

The Company has recognized deferred tax assets in the amount of approximately \$62.3 million (2024: \$119.1 million), relating primarily to future deductions for employee benefits, tax losses and deductions carried forward, and restructuring expenses. These deferred tax assets are recorded based on the Company's estimate that it will earn sufficient taxable profits to fully utilize its tax losses in the appropriate carry over periods.

The Company has recognized deferred tax liabilities in the amount of approximately \$310.4 million (2024: \$397.7 million), relating primarily to claims for tax depreciation in excess of accumulated book depreciation, cash basis farming adjustments, and the excess of book value over the tax cost of intangible assets.

	As at December 31,	
	2025	2024
Deferred tax assets:		
Tax losses and deductions carried forward	\$ 54,655	\$ 85,587
Accrued liabilities	2,996	4,903
Employee benefits	4,670	10,013
Other	—	18,605
	\$ 62,321	\$ 119,108
Deferred tax liabilities:		
Property and equipment	\$ 268,835	\$ 317,875
Cash basis farming	3,786	32,496
Goodwill and other intangible assets	25,905	47,286
Other	11,901	—
	\$ 310,427	\$ 397,657
Classified in the Consolidated Financial Statements as:		
Deferred tax assets	\$ 36,117	\$ 46,588
Deferred tax liability	\$ 284,223	\$ 325,137

Unrecognized Deferred Tax Assets

At December 31, 2025, the Company has unrecognized deferred tax assets of \$79.1 million (2024: \$51.0 million).

Unrecognized Deferred Tax Liabilities

Deferred tax is not recognized on the unremitted earnings of subsidiaries and other investments as the Company is in a position to control the reversal of the temporary difference and it is probable that such differences will not reverse in the foreseeable future. The unrecognized temporary difference at December 31, 2025 for the Company's subsidiaries was \$905.4 million (2024: \$931.1 million).

The Company has recognized a deferred tax liability of \$13.4 million relating to the carrying value over the tax basis of its investment in Canada Packers.

Pillar Two Income Taxes

Pillar Two legislation has been enacted or substantively enacted in certain jurisdictions in which the Company operates. The legislation became effective for the Company's financial year beginning on January 1, 2024. The Company has performed an assessment of its potential exposure to Pillar Two income taxes.

This assessment is based on the most recent information available regarding the financial performance of the constituent entities in the Company. Based on the assessment performed, the Pillar Two effective tax rates in all jurisdictions in which the Company operates are above 15% and management is not aware of any circumstances under which this might change. Therefore, the Company does not expect a potential exposure to Pillar Two top-up taxes.

13. GOODWILL

The net carrying value for goodwill was \$387.4 million as at December 31, 2025 (2024: \$477.4 million) with the full amount allocated to Meat Protein CGU group.

As part of the spin-off of the pork operations, that was completed on October 1, 2025, \$90.0 million of the net carrying value of goodwill was allocated to the disposal group (Note 22).

Annual impairment testing involves determining the recoverable amount of the CGU group to which goodwill is allocated and comparing this to the carrying value of the CGU group. The measurement of the recoverable amount of the Meat Protein CGU group was calculated based on fair value less costs to sell. Fair value was determined by discounting the future cash flows generated from the continuing use of the Meat Protein CGU group. The fair value measurement was categorized as a Level 3 fair value based on the inputs in the valuation technique used. The calculation of the fair value based on discounting the future cash flows which included the following key assumptions:

- Cash inflows and outflows were projected based on the Company's long-term business plan. Cash flows for a further perpetual period were extrapolated using a growth rate of 2.0% for the Meat Protein CGU group (2024: 2.0%).
- The business plan contains forecasts based on past experience of actual operating results in conjunction with anticipated future growth opportunities. While the forecast does assume some base business expansion, the primary engine of growth is strategic in nature and is consistent with the projects and expectations as articulated in the Company's strategic plan and outlook.
- The discount rate applied in determining the recoverable amount of the Meat Protein CGU group was 9.1% (2024: 9.7%). The discount rate was estimated based on the weighted average cost of capital of the Meat Protein CGU group and other competitors in the industry.

The values assigned to the key assumptions represent Management's assessment of future trends in the industries in which the CGU groups operate and are based on both external and internal sources and historical trend data.

There were no impairment charges recorded in 2025 and 2024.

14. INTANGIBLE ASSETS

	As at December 31,	
	2025	2024
Definite life	\$ 96,175	\$ 154,625
Indefinite life	143,732	184,901

⁽ⁱ⁾ Includes disposals and other adjustments.

Amortization

Amortization is recorded through cost of goods sold or SG&A depending on the nature of the asset.

Borrowing Costs

For the year ended December 31, 2025, there were \$0.0 million (2024: \$0.1 million) borrowing costs capitalized, using an average rate of 5.7% (2024: 7.5%).

Indefinite Life Intangibles

Indefinite life intangible assets are comprised of trademarks and quota associated with the Company's poultry operations. The Company expects to renew the registration of the trademarks and poultry quota at each expiry date indefinitely, were applicable, and expects these assets to generate economic benefit in perpetuity. As such, the Company assessed these intangibles to have indefinite useful lives.

The changes in net carrying amounts of indefinite life intangibles during 2025 and 2024 were as follows:

	Indefinite life		
	Trademarks	Quota	Total
Net balance, December 31, 2024	\$ 125,248	\$ 59,653	\$ 184,901
Impairment Loss	(38,400)	—	(38,400)
Foreign currency translation	(2,429)	—	(2,429)
Disposals	—	(340)	(340)
Net balance, December 31, 2025	\$ 84,419	\$ 59,313	\$ 143,732

	Trademarks	Quota	Total
Net balance, December 31, 2023	\$ 120,354	\$ 62,895	\$ 183,249
Foreign currency translation	4,894	—	4,894
Transfer to assets held for sale	—	(1,869)	(1,869)
Disposals	—	(1,373)	(1,373)
Net balance, December 31, 2024	\$ 125,248	\$ 59,653	\$ 184,901

The indefinite life intangible assets are allocated between the Meat Protein and Plant Protein CGU groups as follows:

CGU Group	As at December 31,	
	2025	2024
Meat Protein	\$ 122,734	\$ 123,073
Plant Protein	20,998	61,828
	\$ 143,732	\$ 184,901

The Company performs annual impairment testing on its indefinite life intangible assets. Annual impairment testing, consistent with the impairment testing for goodwill as described in Note 13, involves determining the recoverable amount of each indefinite life intangible asset and comparing it to the net carrying value.

The recoverable amount of trademarks is calculated using the royalty savings approach, which involves present valuing the royalties earned by similar trademarks. The key assumptions used in this determination are:

	2025	2024
Royalty rate	1.0 - 2.5%	1.0 - 6.0%
Terminal growth rate	2.0 - 3.0%	2.0 - 3.0%
Discount rate	9.1 - 15.5%	9.7 - 10.9%

During the year ended December 31, 2025, the Company recognized impairment charges of \$85.0 million related to the intangible assets of the Plant Protein CGU group. This was a result of an impairment test which was triggered during the fourth quarter due to a sustained decline in demand in the plant protein market within North America, leading to a significant decrease in the expected future cash flow from the CGU group.

The measurement of the recoverable amount of the Plant Protein CGU group and the related intangible assets were calculated based on fair value less costs to sell. Fair value was determined by discounting the future cash flows generated from the continuing use of the Plant Protein CGU group and the related intangible assets. The fair value measurement was categorized as a Level 3 fair value based on the inputs in the valuation technique used. The calculation of the fair value based on discounting the future cash flows was based on the following significant assumptions:

- Cash inflows and outflows were projected for five-years based on the Company's long-term business plan. Cash flows for a further perpetual period were extrapolated using a growth rate of 3.0%.
- The business plan contains forecasts based on past experience of actual operating results in conjunction with anticipated future opportunities. This included a decrease of the long-term growth rate in the Plant Protein CGU group recognized during

the year and is consistent with the projections and expectations as articulated in the Company's strategic plan and outlook for pricing, volume, margins and expenses.

- The discount rate applied in determining the recoverable amount of the Plant Protein CGU group was 11.6%. The discount rate was estimated based on the weighted average cost of capital of the Plant Protein CGU group and other competitors in the industry.
- The royalty rate applied in determining the recoverable amount of the trademarks was 2.5%. The royalty rate was estimated based on royalties earned by similar trademarks.

The impairment charge was recorded against trademarks, recipes and customer relationships, based on the discounted cash flows attributed to these assets within the Company's forecasted cash flows.

A 1% decrease in the 5 year cumulative average sales growth rate used in the forecast period would result in a further impairment of approximately \$40 million. A 1% increase in the weighted average cost of capital would result in a further impairment of approximately \$25 million.

15. PROVISIONS

	Restructuring and related provisions			Total
	Environmental	Severance and other employee related costs	Site closing and other cash costs	
Balance at December 31, 2024	\$ 1,978	16,225	191	\$ 18,394
Charges	—	9,929	1,175	11,104
Reversals	—	(984)	—	(984)

Total at December 31, 2024				\$ 18,394

⁽ⁱ⁾ Balance as at December 31, 2023, includes current portion of \$9.8 million and non-current portion of \$2.0 million.

Restructuring and Other Related Costs

For the year ended December 31, 2025 the Company recorded restructuring and other related costs of \$12.7 million. This included \$13.1 million as part of the Company's Fuel for Growth initiative including continued restructuring of the commercial and operational teams, reorganization of other administrative functions post the spin-off of the Company's pork operations, and re-organization of plant leadership structures totalling \$9.7 million in severance and other employee costs. This also included charges of \$3.4 million related to the closure of the Brantford, Ontario facility including accelerated depreciation, inventory impairments and a reversal of severance charges previously accrued. The remaining reversals related to employee costs from the Brampton, Toronto, St. Mary's and Schomberg poultry plants.

For the year ended December 31, 2024, the Company recorded restructuring and other related costs of \$19.9 million. This included \$21.2 million as part of the Company's Fuel for Growth initiative including the reorganization of the commercial and operational teams for a total of \$11.6 million in severance and other employee related costs, and \$9.6 million related to the closure of the Brantford, Ontario facility. The costs associated with the Brantford closure included accelerated depreciation and severance and other employee related costs. The Company also recorded a \$2.1 million severance reversal, and \$0.9 million in decommissioning charges associated with the previously announced Ontario poultry plant closures.

16. LONG-TERM DEBT

	As at December 31,	
	2025	2024
Revolving line of credit	\$ 312,966	\$ 652,000
U.S. term credit Tranche 1	274,420	381,030
Canadian term credit Tranche 2	550,000	350,000
Canadian term credit Tranche 3	—	300,000
Government loans	5,609	6,208
Supplier financing	3,615	6,167
Deferred financing charges	(8,021)	(3,448)
Total long-term debt	\$ 1,138,589	\$ 1,691,957
Current	\$ 2,096	\$ 301,478
Non-current	1,136,493	1,390,479
Total long-term debt	\$ 1,138,589	\$ 1,691,957

As at January 1, 2024 the Company had a syndicated sustainability-linked credit facility (the "Credit Facility") which consisted of a \$1,300.0 million unsecured committed revolving line of credit maturing June 29, 2027, and three unsecured committed term facilities for \$400.0 million (Tranche 3), \$350.0 million (Tranche 2) and US\$265.0 million (Tranche 1) maturing June 20, 2024, June 29, 2026 and June 29, 2027, respectively. On April 30, 2024 the Company amended its Credit Facility, downsizing Tranche 3 to \$300.0 million, and extending the maturity date to June 20, 2025 which was fully repaid at its maturity.

On October 1, 2025, immediately prior to completion of the spin-off transaction, the Company's pork operations entered into a four year secured credit agreement which consisted of \$415 million in aggregate principal amount of term loans, and a \$200 million revolving facility. \$415 million in term loans was drawn on this facility. This facility also had capacity for up to \$50 million in letters of credit, on which \$0.6 million was drawn. This facility, belonging to Canada Packers, was then derecognized as part of the spin-off transaction. The facility was in compliance with all covenants at the time of derecognition.

Upon closing of the spin-off of the Company's pork operations, the Company's existing Credit Facility was amended, and the unsecured committed revolving line of credit was reduced to \$1,200.0 million and extended to mature on October 1, 2030; the unsecured committed term facility (Tranche 1) was reduced to US\$200.0 million and extended to mature on October 1, 2029; and the unsecured committed term facility (Tranche 2) was increased to \$550.0 million and extended to mature on October 1, 2028.

The Credit Facility may be drawn in Canadian or U.S. dollars and bears interest payable monthly, based on Canadian Overnight Repo Rate Average ("CORRA") and Prime rates for Canadian dollar loans and based on the Secured Overnight Financing Rate ("SOFR") for U.S. dollar loans. The Credit Facility is intended to meet the Company's funding requirements for capital investments in addition to providing appropriate levels of liquidity for general corporate purposes. The interest rate on the Credit Facility may be adjusted up or down by a maximum of 5 basis points based on the Company's performance compared to specified sustainability targets.

In addition to the borrowings on the revolving facility and the term credit, as at December 31, 2025 the Company had drawn letters of credit of \$9.4 million on the Credit Facility (2024: \$9.1 million).

The Credit Facility requires the maintenance of certain covenants. As at December 31, 2025, the Company was in compliance with all of these covenants. The primary financial covenant requires that the Company maintain a net debt to capitalization ratio below a specified threshold.

The Company has additional uncommitted credit facilities for issuing letters of credit up to a maximum of \$105.0 million (2024: \$105.0 million). As at December 31, 2025, \$37.2 million in letters of credit had been issued thereon (2024: \$47.6 million).

As at December 31, 2025, the Company has one non-interest bearing government loan of \$5.6 million (2024: \$6.2 million) outstanding and maturing in 2033. The facility is committed.

The Company's estimated average effective cost of borrowing for 2025 was approximately 5.8% (2024: 7.5%). Required repayments of long-term debt are as follows:

2026	\$ 2,612
2027	1,704
2028	551,704
2029	275,643
2030 and thereafter	315,707
Total required repayments of long-term debt	\$ 1,147,370

The following table reconciles the changes in cash flows from financing activities for long-term debt for the period in the respective years:

	As at December 31,	
	2025	2024
Total long-term debt, beginning of period	\$ 1,691,957	\$ 1,950,815
Revolving and term credit facilities - net repayments	\$ (100,300)	\$ (291,400)
Government loans repayments	(815)	(1,185)
Supplier financing new issuance	—	2,886
Supplier financing repayments	(1,478)	(1,282)
Payment of financing fees	(6,506)	(2,324)
Total cash flow from long-term debt financing activities	\$ (109,099)	\$ (293,305)
Foreign exchange revaluation	\$ (30,650)	\$ 30,518
Other non-cash changes	2,149	3,929
Total non-cash changes	\$ (28,501)	\$ 34,447
Disposal of pork operations (Note 22)	\$ (415,768)	\$ —
Total long-term debt, end of period	\$ 1,138,589	\$ 1,691,957

17. LEASE OBLIGATIONS

Changes in the balance of lease obligations during 2025 and 2024 were as follows:

	As at December 31,	
	2025	2024
Total lease obligations, beginning of period	\$ 187,792	\$ 180,317
Payments	(35,202)	(40,626)
Interest	6,866	8,273
Additions	21,078	42,354
Dispositions, retirements, and other	(1,001)	(2,930)
Foreign currency translation	(187)	404
Disposal of pork operations (Note 22)	(85,425)	—
Total lease obligations, end of period	\$ 93,921	\$ 187,792
Current	\$ 18,457	\$ 39,900
Non-current	75,464	147,892
Total lease obligations, end of period	\$ 93,921	\$ 187,792

Total cash outflows arising from lease obligations during 2025 and 2024 were as follows:

	As at December 31,	
	2025	2024
Payment of lease obligations in Financing Activities	\$ 28,336	\$ 32,353
Payment of lease interest expense in Operating Activities	6,866	8,273
Total cash outflow of leases	\$ 35,202	\$ 40,626

The maturity of contractual undiscounted lease obligation payments are as follows:

Due within 1 year	\$ 19,382
Due between 1 and 3 years	30,357
Due between 3 and 5 years	23,352
Due after 5 years	33,545
Total lease obligation payments	\$ 106,636

The Company does not face a significant liquidity risk in regard to its lease obligations. See Note 20.

The following amounts from continuing operations were recognized in the Consolidated Statements of Earnings pertaining to leases:

	As at December 31,	
	2025	2024⁽ⁱⁱⁱ⁾
Variable rent expense ⁽ⁱ⁾	\$ 5,176	\$ 5,253
Short-term rent expense ⁽ⁱⁱ⁾	\$ 1,718	\$ 1,305

⁽ⁱ⁾ Relates to property taxes and common area maintenance on buildings which are calculated annually. These payments make up 28.2% (2024: 29.3%) of fixed payments made in the year for continuing operations.

⁽ⁱⁱ⁾ Pertains primarily to leases of property, equipment and vehicles with a contract term of less than one year.

⁽ⁱⁱⁱ⁾ Restated, see Note 22.

Right-of-use assets associated with the Company's lease obligations are described in Note 8.

18. OTHER CURRENT LIABILITIES

	Notes	As at December 31,	
		2025	2024
Derivative instruments	20	\$ 6,506	\$ 6,765
Contract liabilities		16,877	17,333

19. SHARE CAPITAL

(Thousands of shares)	Common Shares		Treasury Shares	
	2025	2024	2025	2024
Balance at December 31	123,754	122,534	81	170
Distributions under share-based compensation plans	216	89	(216)	(89)
Exercise of share options	1,074	108	—	—
Shares repurchased	(659)	—	—	—
Dividend reinvestment	368	1,023	—	—
Purchase of treasury shares	(350)	—	350	—
Balance at December 31	124,403	123,754	215	81

Common Shares

The authorized share capital consists of an unlimited number of common shares, an unlimited number of non-voting common shares, and an unlimited number of preference shares. These shares have no par value.

The holders of common shares are entitled to receive dividends as declared from time to time, and they are entitled to one vote per share at meetings of the Company.

On October 1, 2025, as part of the spin-off of the Company's pork operations, Maple Leaf's shareholders received one new Maple Leaf common share and 0.2 of a Canada Packers share for each Maple Leaf common share held. Refer to Note 9. Investments for additional information.

Treasury Shares

Treasury shares is comprised of shares purchased by a trust in order to satisfy the requirements of the Company's Restricted Share Unit Plan, as described in Note 24.

Share Repurchase

On March 11, 2025 the Toronto Stock Exchange ("TSX") accepted the Company's notice of intention to commence a Normal Course Issuer Bid ("NCIB"), allowing the Company to repurchase, at its discretion, up to 7.3 million common shares in the open market or as otherwise permitted by the TSX, subject to the normal terms and limitations of such bids. Common shares purchased by the Company are cancelled. The program commenced on March 13, 2025 and will terminate on March 12, 2026. Under this bid, during the year ended December 31, 2025, 0.7 million shares at an average price of \$28.75 per share were repurchased for cancellation.

On May 20, 2023 the TSX accepted the Company's notice of intention to commence a NCIB, allowing the Company to repurchase, at its discretion, up to 7.2 million common shares in the open market or as otherwise permitted by the TSX, subject to the normal terms and limitations of such bids. Common shares purchased by the Company are cancelled. The program commenced on May 25, 2023 and terminated on May 24, 2024. Under this bid, no shares were repurchased for cancellation.

20. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**Capital**

The Company's objective is to maintain a robust, cost-effective capital structure that ensures resilience, supports its long-term growth strategy, and maximizes operating flexibility. In allocating capital to investments to support its earnings goals, the Company establishes internal hurdle return rates for capital initiatives. Capital projects are generally financed with internal cash flows and senior debt where required.

The Company uses leverage in its capital structure to reduce the cost of capital. The Company's goal is to achieve primary credit ratios that provide access to investment-grade credit pricing and terms. The Company measures its credit profile using a number of metrics,

some of which are non-IFRS measures, primarily cash and cash equivalents, less long-term debt and bank indebtedness ("Net Debt") and earnings before interest, taxes, depreciation and amortization ("EBITDA").

In addition to credit facilities and equity, the Company uses leases and a very limited recourse accounts receivable securitization program as additional sources of financing.

The Company has a track record of dividend growth and a long-term sustainable earnings base. From time to time, the Company has purchased shares for cancellation pursuant to normal course issuer bids and to satisfy awards under its Restricted Share Unit Plan described in Note 24.

There have been no material changes to the Company's risk management activities for its continuing operations during the year ended December 31, 2025. As a result of the pork operations spin-off, the Company no longer manages risks arising from raising and procuring hogs or to certain currencies associated with pork export sales.

Financial Instruments

The Company's financial assets and liabilities are classified into the following categories:

Cash and cash equivalents	FVTPL
Accounts receivable	Amortized cost
Notes receivable	Amortized cost
Accounts payable and accruals	Amortized cost
Long-term debt	Amortized cost
Derivative instruments ⁽ⁱ⁾	FVTPL
Portfolio investments	FVTOCI

⁽ⁱ⁾ These derivative instruments may be designated as cash flow hedges, fair value hedges or net investments in foreign operations hedges as appropriate. Derivatives designated as cash flow hedges are classified as FVTOCI.

The Company applies hedge accounting as appropriate and uses derivatives and other non-derivative financial instruments to manage its exposures to fluctuations in foreign exchange rates, interest rates, and commodity prices.

The fair values and notional amounts of derivative financial instruments as at December 31, are shown below:

	2025			2024		
	Notional amount ⁽ⁱ⁾	Fair value		Notional amount ⁽ⁱ⁾	Fair value	
		Asset ⁽ⁱⁱ⁾	Liability ⁽ⁱⁱ⁾		Asset ⁽ⁱⁱ⁾	Liability ⁽ⁱⁱ⁾
Cash flow hedges						
Foreign exchange contracts	\$ —	\$ —	\$ —	\$ 46,746	\$ —	\$ 1,618
Interest rate swaps	\$ 400,000	3,042	4,825	\$ 400,000	5,285	5,429
		\$ 3,042	\$ 4,825		\$ 5,285	\$ 7,047
Fair value hedges⁽ⁱⁱⁱ⁾						
Foreign exchange contracts	\$ —	\$ —	\$ —	\$ 73,942	\$ 6	\$ 2,533
Commodity contracts	\$ —	—	—	\$ 70,822	450	—
		\$ —	\$ —		\$ 456	\$ 2,533
Derivatives not designated in a formal hedging relationship						
Interest rate swaps	\$ 225,469	\$ —	\$ 2,473	\$ —	\$ —	\$ —
Foreign exchange contracts	\$ 46,324	—	850	\$ 95,547	1,138	679
Commodity contracts	\$ 65,185	2,526	—	\$ 118,568	1,665	—
		\$ 2,526	\$ 3,323		\$ 2,803	\$ 679
Total fair value		\$ 5,568	\$ 8,148		\$ 8,544	\$ 10,259
Current ^{(i)(iv)}		\$ 4,206	\$ 6,506		\$ 5,776	\$ 6,765
Non-current ⁽ⁱⁱ⁾		1,362	1,642		2,768	3,494
Total fair value		\$ 5,568	\$ 8,148		\$ 8,544	\$ 10,259

⁽ⁱ⁾ Unless otherwise stated, notional amounts are stated at the contractual Canadian dollar equivalent.

⁽ⁱⁱ⁾ The current portion of derivative assets and liabilities are recorded in prepaid expenses and other assets and other current liabilities, respectively, in the Consolidated Balance Sheets. The non-current portion of derivative assets and liabilities are recorded in other long-term assets and other long-term liabilities, respectively, in the Consolidated Balance Sheets.

⁽ⁱⁱⁱ⁾ The carrying amount of the hedged items in the Consolidated Balance Sheets are recorded at the inverse of the associated hedging instruments and are equal to the accumulated fair value hedge adjustments less hedge ineffectiveness.

^(iv) As at December 31, 2025, the above fair value of current assets has been increased by \$0.4 million (December 31, 2024: \$1.1 million), and the above fair value of current liabilities has decreased by \$0.0 million (December 31, 2024: \$0.0 million) on the Consolidated Balance Sheets, representing the difference in the fair market value of exchange traded commodity contracts and the initial margin requirements. The difference in margin requirements and fair market value is net settled in cash each day with the futures exchange and is recorded within cash and cash equivalents.

The Company's financial assets and liabilities include accounts receivable, notes receivable and accounts payable and accruals for which fair value approximates the carrying value due to their short-term nature.

The carrying value of long-term debt as at December 31, 2025 and 2024 approximates its fair value. The fair value of the Company's long-term debt has been classified as Level 2 in the fair value hierarchy and was estimated based on discounted future cash flows using current rates for similar financial instruments subject to similar risks and maturities.

The Company's cash and cash equivalents, and derivative instruments are recorded at fair value. The fair value of cash and cash equivalents approximates carrying value due to the short-term nature of the assets and has been classified as Level 1 in the fair value hierarchy. The fair values of the Company's interest rate and foreign exchange derivative instruments were estimated using current market measures for interest rates and foreign exchange rates. Commodity futures and commodity options contracts are exchange-traded and over-the-counter. Fair value is determined based on exchange prices and other observable market data.

Net gains and losses on financial instruments recognized at fair value through profit or loss consist of realized and unrealized gains and losses on derivatives that were de-designated or were otherwise not in a formal hedging relationship.

For the year ended December 31, 2025, the Company recorded a loss of \$1.1 million (2024: gain of \$3.2 million - restated to exclude discontinued operations) on financial instruments recognized at fair value through profit or loss.

The table below sets out fair value measurements of derivative financial instruments as at December 31, 2025 using the fair value hierarchy:

	Level 1	Level 2	Level 3	Total
Assets:				
Commodity contracts ⁽ⁱ⁾	\$ 2,526	—	—	\$ 2,526
Interest rate swaps	—	3,042	—	3,042
	\$ 2,526	3,042	—	\$ 5,568
Liabilities:				
Foreign exchange contracts	\$ —	850	—	\$ 850
Interest rate swaps	—	7,298	—	7,298
	\$ —	8,148	—	\$ 8,148

⁽ⁱ⁾ Level 1 commodity contracts are net settled and recorded as a net asset or liability on the Consolidated Balance Sheets.

There were no transfers between levels for the year ended December 31, 2025. Determination of fair value and the resulting hierarchy requires the use of observable market data whenever available. The classification of a financial instrument in the hierarchy is based upon the lowest level of input that is significant to the measurement of fair value. For financial instruments that are recognized at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization at the end of each reporting period.

Accumulated Other Comprehensive Income

The Company estimates that \$1.1 million, net of tax of \$0.4 million, of the unrealized loss included in accumulated other comprehensive income will be reclassified into earnings within the next 12 months. The actual amount of this reclassification will be impacted by future changes in the fair value of financial instruments designated as cash flow hedges. The actual amount reclassified could differ from this estimated amount.

During the year ended December 31, 2025 a gain of \$0.2 million net of tax of \$0.1 million was released to earnings from accumulated other comprehensive (loss) income and included in the net change for the year (2024: gain of \$3.3 million net of tax of \$1.1 million - restated to exclude discontinued operations).

The risks associated with the Company's financial instruments and policies for managing these risks are detailed below.

Investments

The Company holds strategic long-term equity investments in both Canada Packers and in private companies that are not quoted in an active market. The Company exercises significant influence over Canada Packers and therefore the equity interest is accounted for as an investment in associate using the equity method of accounting. The quoted market value of the investment in Canada Packers as at December 31, 2025 is approximately \$76.5 million based on the price available on the Toronto Stock Exchange. For all other portfolio investments, the Company applies the Fair Value Method where values are determined using available financial and market information which can include financial statements, company projections and evidence from external transactions in the private company's equity. Changes in fair value for the portfolio investments are recorded in other comprehensive income, as this best represents the Company's position to maintain a long-term interest in these holdings.

Market Risk

Interest Rate Risk

Interest rate risk refers to the risk that the value of a financial instrument or cash flows associated with the instrument will fluctuate due to changes in market interest rates.

The Company's interest rate risk arises from long-term borrowings issued at fixed rates that create fair value interest rate risk and variable-rate borrowings that create cash flow interest rate risk. In addition, the Company's cash balances are typically invested in short-term interest-bearing assets.

The Company manages its interest rate risk exposure by using a mix of fixed and variable-rate debt and periodically using interest rate derivatives to achieve the desired proportion of variable to fixed-rate debt.

As at December 31, 2025, the Company had variable-rate debt of \$1,137.4 million with a weighted average interest rate of 4.8% (2024: \$1,683.0 million at a weighted average interest rate of 6.4%). The Company effectively converted \$400.0 million of the variable-rate debt to fixed-rate debt using interest rate swaps with a weighted average interest rate of 4.7% (2024: \$400.0 million at a weighted average interest rate of 5.7%). In addition, the Company was exposed to floating interest rates on its accounts receivable securitization program. As at December 31, 2025, the cash advance received pursuant to this program was \$150.0 million at a weighted average

interest rate of 3.3% (2024: \$141.8 million at a weighted average interest rate of 3.9%). The maximum amount available to the Company under these programs is \$150.0 million (2024: \$150.0 million).

As at December 31, 2025, the Company had fixed-rate debt of \$5.6 million (2024: \$6.2 million) with a weighted average effective interest rate of 3.7% (2024: 3.7%). Changes in market interest rates cause the fair value of long-term debt with fixed interest rates to fluctuate but do not affect earnings, as the Company's debt is carried at amortized cost and the carrying value does not change as interest rates change.

As at December 31, 2025, 31.6% (2024: 22.2%) of the Company's outstanding debt and revolving accounts receivable securitization program were not exposed to interest rate movements, after including the effect of interest rate swaps.

The Company's designated interest rate swaps are accounted for as cash flow hedges to reduce variability of floating rate interest payments of variable-rate debt. These interest rate swaps settle periodically against CORRA and mature in 2027.

The critical terms of designated interest rate swaps and the associated hedged items are similar. The Company performs a quantitative assessment of the effectiveness, and it is expected that the value of the interest rate swaps and the value of the corresponding hedged items will systematically change in opposite directions in response to movements in the underlying interest rates. Sources of hedge ineffectiveness include the effect of the counterparty and the Company's own credit risk on the fair value of the interest rate swaps and a lack of access to negative benchmark interest rates on the Company's borrowings.

The change in fair values of interest rate hedges used as the basis for recognizing ineffectiveness for the year ended December 31, 2025 and 2024 were as follows:

	2025		2024	
	Hedging instruments	Hedged items	Hedging instruments	Hedged items
Cash flow hedges	\$ (1,783)	\$ 1,759	\$ (144)	\$ 85

Amounts recognized in the Consolidated Statements of Other Comprehensive Income (Loss) as at December 31, consist of:

	2025		2024	
	Continuing hedges	Discontinued hedges	Continuing hedges	Discontinued hedges
Cash flow hedges				
Balance, beginning of year	\$ (85)	\$ —	\$ 1,073	\$ 2,878
Eligible change in fair value of interest rate swaps	(1,674)	—	(1,158)	(2,878)
Balance, end of year	\$ (1,759)	\$ —	\$ (85)	\$ —

It is estimated that, all else constant, an adverse hypothetical 10.0% change in the variable interest rate would result in a decrease in the fair value of the Company's interest rate swaps of \$1.4 million, with a decrease in other comprehensive income (loss) of \$1.4 million.

Foreign Exchange Risk

Foreign exchange risk refers to the risk that the value of financial instruments or cash flows will fluctuate due to changes in foreign exchange rates.

The Company's foreign exchange risk arises primarily from transactions in currencies other than Canadian dollars, including sales and purchases in foreign currencies, foreign denominated borrowings, and investments in foreign operations. The primary currency to which the Company is exposed to is the U.S. dollar.

The Company uses foreign exchange forward contracts to manage foreign exchange transaction exposures. The Company uses forward contracts which are accounted for as fair value hedges to minimize the price risk assumed under forward priced contracts with suppliers. The Company also uses forward contracts which are accounted for as cash flow hedges as well as non-designated derivative instruments to minimize the price risk of anticipated transactions. The Company uses cross-currency interest rate swaps to manage certain foreign denominated borrowings when appropriate.

The critical terms of foreign exchange forward contracts and the associated hedged items are similar. The Company performs a quantitative assessment of the effectiveness, and it is expected that the value of the forward contracts and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the underlying exchange rates. The main source of hedge ineffectiveness in these hedging relationships is the effect of the counterparty and the Company's own credit risk on the fair value of the foreign exchange contracts, which is not reflected in the fair value of the hedged item. Other sources of ineffectiveness include differences in the underlying terms of the foreign exchange contracts and the hedged items.

The Company had no designated foreign exchange forward contracts as at December 31, 2025.

As at December 31, 2025, the Company had US\$200.0 million (2024: US\$265.0 million) of U.S. dollar-denominated borrowings that were drawn on its U.S. term credit of which US\$200.0 million (2024: US\$245.2 million) is designated as a net investment hedge of the Company's U.S. operations. Foreign exchange gains and losses on the designated drawings are recorded in accumulated other comprehensive income and offset translation adjustments on the underlying net assets of the U.S. operations, which are also recorded in accumulated other comprehensive income.

The gain on the net investment hedge recorded in other comprehensive income (loss) for the year ended December 31, 2025 was \$12.7 million, net of tax of \$2.3 million (2024: loss of \$24.2 million, net of tax of \$4.5 million).

The critical terms of the designated U.S. dollar-denominated borrowings and the associated hedged items are the same. The Company performs a qualitative assessment of the effectiveness, and it is expected that the value of the designated U.S. dollar-denominated borrowings and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the underlying exchange rates. There are no sources of hedge ineffectiveness.

The change in fair values of foreign exchange hedges used as the basis for recognizing ineffectiveness for the year ended December 31, 2025 and 2024 were as follows:

	2025		2024	
	Hedging instruments	Hedged items	Hedging instruments	Hedged items
Cash flow hedges	\$ —	\$ —	\$ (1,618)	\$ 1,602
Fair value hedges	\$ —	\$ —	\$ (2,527)	\$ 2,533
Net investment in foreign operations	\$ (6,580)	\$ 6,580	\$ (24,722)	\$ 24,722

Amounts recognized in the Consolidated Statements of Other Comprehensive Income (Loss) as at December 31, consist of:

	2025		2024	
	Continuing hedges	Discontinued hedges	Continuing hedges	Discontinued hedges
Cash flow hedges				
Balance, beginning of year	\$ (1,602)	\$ —	\$ 962	\$ —
Eligible change in fair value of foreign exchange contracts	1,454	—	(2,564)	—
Disposal of pork operations	148	—	—	—
Balance, end of year	\$ —	\$ —	\$ (1,602)	\$ —

	2025		2024	
	Continuing hedges	Discontinued hedges	Continuing hedges	Discontinued hedges
Net investment in foreign operations				
Balance, beginning of year	\$ (24,722)	\$ (10,289)	\$ 4,015	\$ (10,289)
Eligible change in fair value of U.S. denominated drawings	18,142	(3,184)	(28,737)	—
Balance, end of year	\$ (6,580)	\$ (13,473)	\$ (24,722)	\$ (10,289)

It is estimated that, all else constant, an adverse hypothetical 10.0% change in the value of the Canadian dollar against all relevant currencies would result in a decrease in the fair value of the Company's foreign exchange forward contracts of \$4.5 million, with a decrease in earnings before taxes of \$4.5 million. The impact on earnings before taxes does not include the offsetting impact of the foreign exchange risk inherent in the transactions being hedged.

It is estimated that, all else constant, an adverse hypothetical 10.0% change in the value of the Canadian dollar against all relevant currencies would result in a decrease in the fair value of the Company's cross currency swaps of \$22.3 million, with a decrease in earnings before taxes of \$22.3 million. The impact on earnings before taxes does not include the offsetting impact of the foreign exchange risk inherent in the transactions being hedged.

Commodity Price Risk

The Company is exposed to price risk related to commodities such as meat products, fuel, and certain other raw materials. The Company uses fixed price contracts with suppliers as well as exchange-traded and over-the-counter futures and options to manage its exposure to price fluctuations.

The Company uses non-designated derivative instruments to minimize the price risk of anticipated transactions.

It is estimated that, all else constant, an adverse hypothetical 10.0% change in market prices of the underlying commodities would result in a decrease in the fair value of underlying outstanding derivative contracts of \$6.5 million, with a decrease in earnings before taxes of \$6.5 million. The impact on earnings before taxes does not include the offsetting impact of the commodity price risk inherent in the transactions being hedged.

Credit Risk

Credit risk refers to the risk of losses due to failure of the Company's customers and counterparties to meet their payment obligations.

In the normal course of business, the Company is exposed to credit risk from its customers, substantially all of which are in the retail, foodservice, and industrial channels. The Company performs ongoing credit evaluations of new and existing customers' financial condition and reviews the collectability of its trade accounts receivable and other receivables in order to mitigate any possible credit losses. The Company records a loss allowance of expected credit losses for financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance at an amount equal to the lifetime expected credit losses if the credit risk on its financial assets has increased significantly since initial recognition. If credit risk has not significantly increased since initial recognition, the Company measures the loss allowance at an amount equal to the 12-month expected credit losses. Average accounts receivable days sales outstanding for the year is consistent with historical trends other than changes associated with the spin-off of the company's pork operations.

Management believes concentrations of credit risk with respect to accounts receivable are limited due to the generally high credit quality of the Company's major customers, the large number and geographic dispersion of smaller customers, and the operation of the accounts receivable securitization facility as described in Note 27. The Company does, however, conduct a significant amount of business with a small number of large grocery retailers. The Company's three largest customers as at December 31, 2025 comprise approximately 41.2% (2024 three largest customers representing 41.0%) of total sales.

The Company is also exposed to credit risk on its notes receivable from an unconsolidated structured entity in respect of the accounts receivable securitization program as described in Note 27. Management believes that this credit risk is limited by the long-term AA- debt rating held by the financial institution financing the third-party trust. The Company is exposed to credit risk on its cash and cash equivalents (comprising primarily of deposits with Canadian chartered banks) and over-the-counter derivative contracts. The Company mitigates this credit risk by transacting primarily with counterparties that are major international financial institutions with long-term debt ratings of A or higher. The Company's maximum exposure to credit risk at the balance sheet date consisted primarily of the carrying value of non-derivative financial assets and over-the-counter derivatives with positive fair values.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. The contractual undiscounted cash flows payable in respect of financial liabilities as at the balance sheet date, were as follows:

	December 31, 2025				
	Due within 1 year	Due between 1 and 3 years	Due between 3 and 5 years	Due after 5 years	Total
Financial liabilities					
Accounts payable and accruals	\$ 514,585	—	—	—	\$ 514,585
Debt	2,612	553,408	275,643	315,707	1,147,370
Foreign exchange contracts	850	—	—	—	850
Interest rate swaps	5,656	1,642	—	—	7,298
Lease obligations	19,382	30,357	23,352	33,545	106,636
Other liabilities	17,020	2,947	—	—	19,967
Total	\$ 560,105	588,354	298,995	349,252	\$ 1,796,706

The Company manages liquidity risk by monitoring forecasted and actual cash flows, minimizing reliance on any single source of credit, maintaining sufficient undrawn committed credit facilities and managing the maturity profiles of financial assets and financial liabilities to minimize re-financing risk.

As at December 31, 2025, the Company had available undrawn committed credit of \$876.7 million (2024: \$638.9 million) under the terms of its principal banking arrangements as described in Note 16. These banking arrangements are subject to certain covenants and other restrictions.

21. INTEREST EXPENSE AND OTHER FINANCING COSTS

	2025	2024 ⁽ⁱ⁾
Interest on borrowings from credit facility	\$ 81,582	\$ 141,140
Interest on lease obligations	3,407	3,736
Interest on securitized receivables	5,002	6,620
Interest on government loans	216	246
Amortization of deferred financing charges	2,515	3,683
Credit facility standby fees and other interest	3,477	3,827
	\$ 96,199	\$ 159,252
Interest paid and capitalized	(1,008)	(1,128)
	\$ 95,191	\$ 158,124

⁽ⁱ⁾ Restated, see Note 22.

Interest paid during the year ended December 31, 2025 was \$98.3 million (2024: \$150.1 million).

22. DISCONTINUED OPERATIONS

On October 1, 2025, the Company completed a spin-off transaction, resulting in a loss of control over its pork operations. Accordingly, the results of the pork operations have been presented as discontinued operations in the consolidated statement of earnings up to the date of the spin-off. Prior period comparative information has been restated to reflect this classification.

The amounts included in discontinued operations are presented below:

Years ended December 31,	2025	2024
Sales	\$ 1,038,343	\$ 1,261,642
Cost of goods sold	868,815	1,038,986
Gross profit	\$ 169,528	\$ 222,656
Selling, general and administrative expenses	38,960	45,400
Earnings before the following:	\$ 130,568	\$ 177,256
Other expense	27,964	23,614
Earnings before interest and income taxes	\$ 102,604	\$ 153,642
Interest expense and other financing costs	3,295	4,476
Earnings before income taxes	\$ 99,309	\$ 149,166
Income tax expense	30,503	40,700
Earnings before gain on disposal of pork operations	\$ 68,806	\$ 108,466
Gain on disposal of pork operations	428,879	—
Earnings from discontinued operations	\$ 497,685	\$ 108,466

As a result of the spin-off transaction, the Company recognized a gain on disposal of \$428.9 million net of tax of \$10.5 million, which is recorded in the earnings of discontinued operations.

Earnings per share from discontinued operations:

Years ended December 31,	2025	2024
Earnings per basic share from discontinued operation	\$ 4.01	\$ 0.88
Earnings per diluted share from discontinued operation	\$ 3.91	\$ 0.87
Weighted average number of shares (millions)	124.2	123.0

The presentation of discontinued operations includes intercompany eliminations, and does not include the allocation of certain shared costs that were incurred during the period where those costs will continue, nor does it reflect all of the ongoing relationships that will

exist between Maple Leaf and the spun-off pork operations. Transaction and related costs of the spin-off have been included in other expense within discontinued operations.

The net cash flows provided by (used in) the pork operations are as follows:

Years ended December 31,	2025	2024
Operating	\$ 148,041	\$ 108,159
Investing	(25,487)	(28,183)
Financing	401,620	(18,954)
Net cash flows	\$ 524,174	\$ 61,022

The carrying amounts of assets, liabilities, and accumulated other comprehensive income of the disposal group as at the date of transaction were:

	Notes	As at October 1, 2025
Assets of disposal group:		
Cash and cash equivalents		\$ 32,278
Accounts receivable		112,769
Inventories		89,412
Biological assets	6	155,165
Prepaid expenses and other assets		6,135
Property and equipment	7	319,325
Right-of-use assets	8	81,328
Investments		1,023
Investment properties	10	6,900
Other long-term assets		3,992
Deferred tax asset		1,900
Goodwill	13	90,000
Intangible assets	14	892
Total assets of disposal group		\$ 901,119
Liabilities of disposal group:		
Accounts payable and accruals		\$ 113,549
Income taxes payable		4,266
Other current liabilities		971
Long-term debt	16	415,768
Lease obligations	17	85,425
Deferred tax liability		25,612
Employee benefits	11	1,856
Total liabilities of disposal group		\$ 647,447
Accumulated other comprehensive income of disposal group:		
Foreign currency translation adjustment		\$ (1,619)
Unrealized losses on cash flow hedges		(110)
Total accumulated other comprehensive income of disposal group		\$ (1,729)

On October 1, 2025, Maple Leaf's Shareholders received, for each Maple Leaf Foods Common Share held before the spin-off, one Maple Leaf Foods Inc. Common Share and 0.2 of a Canada Packers Inc. Share, with Maple Leaf Foods retaining a 16% ownership interest in Canada Packers.

As part of the spin-off transaction, Maple Leaf received shares in exchange for the net assets of the pork operations. Immediately prior to the spin-off on October 1, the pork operations obtained its own financing facility and distributed \$417.4 million to Maple Leaf as a return of capital.

The gain on disposal of pork operations is calculated as follows:

Fair value of pork operations' equity:

Investment retained	\$ 113,646
Distribution to shareholders	596,643
Total fair value of pork operations' equity	\$ 710,289

Net assets of disposal group:

Total assets of disposal group	\$ 901,119
Total liabilities of disposal group	(647,447)
Total accumulated other comprehensive income of disposal group	1,729
Total net assets of disposal group	\$ 255,401

Gain on disposal before transaction cost and other items	\$ 454,888
Transaction and other costs	(15,509)
Gain on disposal of pork operations before income taxes	\$ 439,379
Income tax expense on disposal of pork operations	(10,500)
Gain on disposal of pork operations	\$ 428,879

The fair value of the pork operations equity was determined using a valuation report prepared by a third party expert. The valuation was based on an analysis of forecasts provided by management.

23. EARNINGS (LOSS) PER SHARE

Earnings (loss) per basic share amounts are calculated by dividing the earnings (loss) of the Company by the weighted average number of shares outstanding during the period.

Earnings (loss) per diluted share amounts are calculated by dividing the earnings (loss) of the Company by the weighted average number of shares outstanding during the period, adjusted for the effects of potentially dilutive instruments.

The following table sets forth the calculation of basic and diluted earnings (loss) per share ("EPS"):

Year ended December 31,	2025			2024		
	Earnings	Weighted average number of shares ⁽ⁱ⁾	EPS	Earnings (Loss)	Weighted average number of shares ⁽ⁱ⁾	EPS
Basic						
Continuing operations	\$ 43,945	124.2	\$ 0.35	\$ (11,867)	123.0	\$ (0.10)
Discontinued operations ⁽ⁱⁱ⁾	497,685	124.2	\$ 4.01	108,466	123.0	\$ 0.88
	\$ 541,630	124.2	\$ 4.36	\$ 96,599	123.0	\$ 0.79
Effect of dilutive securities ⁽ⁱⁱⁱ⁾		3.2			1.3	
Diluted						
Continuing operations	\$ 43,945	127.4	\$ 0.34	\$ (11,867)	123.0	\$ (0.10)
Discontinued operations ⁽ⁱⁱ⁾	497,685	127.4	\$ 3.91	108,466	124.3	\$ 0.87
	\$ 541,630	127.4	\$ 4.25	\$ 96,599	124.3	\$ 0.78

⁽ⁱ⁾ In millions.

⁽ⁱⁱ⁾ Includes gain on disposal of \$428.9 million.

⁽ⁱⁱⁱ⁾ Excludes the effect of stock options and restricted share units relating to continuing operations of approximately 0.03 million (2024: 7.5 million) and discontinued operations of 0.03 million (2024: 6.3 million) that are anti-dilutive for the twelve months ended December 31, 2025.

24. SHARE-BASED PAYMENT

Under the Maple Leaf Foods Share Option Plan in effect as at December 31, 2025, the Company may grant options to its employees and employees of its subsidiaries to purchase common shares of the Company. Under the Maple Leaf Foods Restricted Share Unit Plan (the "2006 Plan") in effect as at December 31, 2025, the Company may grant Restricted Share Units ("RSUs") and Performance Share Units ("PSUs") to its employees and employees of its subsidiaries entitling employees to receive common shares or cash at the Company's option. Options, RSUs, and PSUs are granted from time to time by the Human Resources and Compensation Committee or by the Board of Directors on the recommendation of the Human Resources and Compensation Committee. The vesting conditions for options, RSUs, and PSUs are specified by the Board of Directors and may include the continued service of the employee with the Company and/or other criteria based on measures of the Company's performance.

Under the Company's Share Purchase and Deferred Share Unit Plans, eligible Directors may elect to receive their retainer and fees in the form of Deferred Share Units ("DSUs") or as common shares of the Company.

Stock Options

A summary of the status of the Company's outstanding stock options as at December 31, 2025 and 2024 are presented below:

	2025		2024	
	Options outstanding	Weighted average exercise price	Options outstanding	Weighted average exercise price
Outstanding, beginning of year	7,299,200	\$ 25.62	6,537,050	\$ 26.83
Granted	870,300	\$ 24.64	1,793,850	\$ 22.95
Exercised	(1,073,308)	\$ 25.30	(108,200)	\$ 23.08
Forfeited ⁽ⁱ⁾	(202,850)	\$ 23.76	(156,300)	\$ 24.76
Expired	(667,200)	\$ 32.47	(767,200)	\$ 30.20
Exchanged ⁽ⁱⁱ⁾	1,260,340	\$ 0.04	—	\$ —
Modification ⁽ⁱⁱⁱ⁾	—	\$ (0.60)	—	\$ —
Outstanding, end of year	7,486,482	\$ 20.09	7,299,200	\$ 25.62
Options currently exercisable	4,872,667	\$ 20.58	4,797,900	\$ 26.63

- ⁽ⁱ⁾ Includes 194,900 options held by employees of the pork operations ("transferred employees") on October 1, 2025, which were exchanged for Canada Packers stock options in connection with the closing of the spin-off transaction
- ⁽ⁱⁱ⁾ In connection with the closing of the spin-off transaction on October 1, 2025, all outstanding stock options held by employees and former employees of the Company or its subsidiaries (other than transferred employees) ("non-transferred employees") were exchanged for new Maple Leaf Foods stock options which were adjusted to ensure that the aggregate in-the-money value of such new Maple Leaf stock options immediately after the effective time of the spin-off transaction was substantially the same, and did not exceed, the aggregate in-the-money value of such Maple Leaf Foods stock options immediately prior to the effective time of the spin-off transaction. The fair value of the Maple Leaf Foods stock options before the exchange approximates the fair value of the new Maple Leaf Foods stock options immediately after the exchange.
- ⁽ⁱⁱⁱ⁾ In connection with the payment of the special dividend on December 19, 2025, the exercise price of each outstanding Maple Leaf Foods stock option was reduced, with the approval of the Toronto Stock Exchange, by an amount equal to the per share amount of the special dividend to reflect the change in share value as a result of the distribution.

All outstanding stock options vest and become exercisable over a period not exceeding five years (time vesting) from the date of grant. The outstanding options have a term of seven years.

The number of options outstanding as at December 31, 2025, is as follows:

Range of exercise prices	Options outstanding			Options currently exercisable		Options subject to time vesting only	
	Number outstanding	Weighted average exercise price	Weighted average remaining term of options (in years)	Number exercisable	Weighted average exercise price	Number outstanding	Weighted average exercise price
\$ 18.52 to \$ 19.92	4,641,926	\$ 19.01	4.3	2,038,559	\$ 18.81	2,603,367	\$ 19.16
\$ 20.31 to \$ 21.44	1,328,865	\$ 20.53	2.6	1,318,417	\$ 20.52	10,448	\$ 21.44
\$ 22.89 to \$ 24.57	1,515,691	\$ 23.00	1.7	1,515,691	\$ 23.00	—	\$ —
Total Options	7,486,482	\$ 20.09	3.5	4,872,667	\$ 20.58	2,613,815	\$ 19.17

The number of options outstanding as at December 31, 2024, is as follows:

Range of exercise prices	Options outstanding			Options currently exercisable		Options subject to time vesting only	
	Number outstanding	Weighted average exercise price	Weighted average remaining term of options (in years)	Number exercisable	Weighted average exercise price	Number outstanding	Weighted average exercise price
\$ 20.28 to \$ 25.10	4,766,100	\$ 23.66	4.4	2,498,700	\$ 24.06	2,267,400	\$ 23.23
\$ 26.38 to \$ 28.38	1,806,800	\$ 28.07	2.8	1,572,900	\$ 28.07	233,900	\$ 28.07
\$ 30.22 to \$ 32.75	726,300	\$ 32.38	0.2	726,300	\$ 32.38	—	\$ —
Total Options	7,299,200	\$ 25.62	3.6	4,797,900	\$ 26.63	2,501,300	\$ 23.68

At grant date, each option series is measured at fair value based on the Black-Scholes formula. Expected volatility is estimated by considering historic average share price volatility. The inputs used in this model for the options granted during the year ended December 31, 2025 and 2024 are shown in the table below⁽ⁱ⁾:

	2025	2024
Share price at grant date	\$25.22	\$22.99
Exercise price	\$24.64	\$22.95
Expected volatility	30.8%	32.1%
Option life (in years) ⁽ⁱⁱ⁾	4.5	4.5
Expected dividend yield	4.5%	4.6%
Risk-free interest rate ⁽ⁱⁱⁱ⁾	2.5%	3.6%

⁽ⁱ⁾ Weighted average based on number of units granted.

⁽ⁱⁱ⁾ Expected weighted average life.

⁽ⁱⁱⁱ⁾ Based on Government of Canada bonds.

The fair value of options granted during the year ended December 31, 2025 was \$4.1 million (2024: \$7.9 million). Expenses relating to current and prior year options were \$5.1 million (2024: \$6.1 million - restated to exclude discontinued operations).

Restricted Share Units and Performance Share Units

The awards granted under the 2006 Plan are satisfied either by shares to be purchased on the open market by a trust established for that purpose or cash at the time of vesting.

Under the 2006 Plan, one common share of the Company may be distributed for each RSU, and these units vest strictly over time. The PSUs are subject to both time and performance vesting. The PSUs provide the holder with up to two RSUs based on the achievement of predetermined Company performance targets. All outstanding RSUs and PSUs under the 2006 Plan vest over a period of approximately one to three years from the date of grant.

A summary of the status of the Company's RSU plans (including PSUs) as at December 31, 2025 and 2024 are presented below:

	2025		2024	
	Share units outstanding	Weighted average fair value at grant	Share units outstanding	Weighted average fair value at grant
Outstanding, beginning of year	3,224,990	\$ 21.38	2,018,396	\$ 23.87
Granted	941,590	\$ 22.28	1,861,351	\$ 19.39
Exercised	(533,478)	\$ 24.21	(262,532)	\$ 24.08
Forfeited ⁽ⁱ⁾	(704,671)	\$ 23.59	(392,225)	\$ 22.94
Exchanged ⁽ⁱⁱ⁾	587,284	\$ (0.03)	—	\$ —
Modification ⁽ⁱⁱⁱ⁾	84,512	\$ —	—	\$ —
Outstanding, end of year	3,600,227	\$ 16.77	3,224,990	\$ 21.38

⁽ⁱ⁾ Includes 270,267 RSUs and PSUs held by transferred employees on October 1, 2025 which were amended so that the "Share" underlying such RSUs and PSUs refers to a common share of Canada Packers and the aggregate value of such RSUs and PSUs was the same immediately before and immediately after the effective time of the spin-off transaction. Pursuant to the transaction agreements entered into in connection with the spin-off transaction, Maple Leaf Foods' obligation in respect of the RSUs and PSUs held by transferred employees became an obligation of Canada Packers.

⁽ⁱⁱ⁾ In connection with closing of the spin-off transaction on October 1, 2025, all outstanding RSUs and PSUs held by non-transferred employees were adjusted to ensure that the aggregate value of such RSUs and PSUs was the same immediately before and immediately after the effective time of the spin-off transaction. The fair value of the outstanding RSUs and PSUs before the adjustment approximates the fair value of the RSUs and PSUs immediately after the adjustment.

⁽ⁱⁱⁱ⁾ In connection with the payment of the special dividend on December 19, 2025, each holder of Maple Leaf Foods RSUs and PSUs was credited with additional RSUs and PSUs with an aggregate value equal to the per share amount of the special dividend multiplied by the number of RSUs or

PSUs, as applicable, credited to the holder immediately prior to the payment of the special dividend, subject to the same vesting conditions as their existing RSUs and PSUs.

The fair value of RSUs and PSUs granted during the 2025 was \$17.6 million (2024: \$31.5 million). Expenses for the year ended December 31, 2025 relating to current and prior year RSUs and PSUs, were \$16.8 million (2024: \$13.9 million - restated to exclude discontinued operations), of which \$2.1 million (2024: \$1.1 million) will be paid in cash and the remainder settled in shares.

A portion of the outstanding RSUs and PSUs will be settled in cash. The total liability recorded for these units is \$2.9 million (2024: \$1.7 million).

The key assumptions used in the valuation of fair value of RSUs and PSUs granted during the year are shown in the table below⁽ⁱ⁾:

	2025	2024
Expected RSU life (in years)	3.0	2.6
Forfeiture rate	16.1%	12.5%
Risk-free interest rate ⁽ⁱⁱ⁾	2.5%	4.0%

⁽ⁱ⁾ Weighted average based on number of units granted.

⁽ⁱⁱ⁾ Based on Government of Canada bonds.

Deferred Share Units

If an eligible Director elects to receive their retainer and fees as common shares of the Corporation, the Company purchases shares at market rates on behalf of the participating Directors.

In 2013, the Company adopted a new share purchase and Deferred Share Unit plan (the "2013 DSU Plan"), which replaced the Company's existing share purchase and deferred share unit plan. The 2013 DSU Plan allows the Company, at its discretion, the flexibility to satisfy DSUs in common shares, either issued from treasury or purchased by the Company on the open market.

Expenses for the year ended December 31, 2025 were \$2.3 million (2024: \$1.5 million).

A summary of the status of the Company's outstanding DSUs as at December 31, 2025 and 2024 are presented below:

Units outstanding	2025	2024
Outstanding, beginning of year	237,746	338,799
Additions: granted	71,757	52,478
Additions: dividends reinvested	18,719	11,434
Exercised	—	(164,965)
Exchanged ⁽ⁱ⁾	60,029	—
Outstanding, end of year	388,251	237,746

⁽ⁱ⁾ In connection with the closing of the spin-off transaction on October 1, 2025, all outstanding DSUs were adjusted to ensure that the aggregate value of such DSUs was the same immediately before and immediately after the effective time of the spin-off transaction. The Fair value of the outstanding DSUs before the adjustment approximates the fair value of the DSUs immediately after the adjustment.

25. GEOGRAPHIC AND CUSTOMER PROFILE

Information About Geographic Areas

The following summarizes sales by country of origin:

	2025	2024 ⁽ⁱ⁾
Canada	\$ 3,488,133	\$ 3,207,769
U.S.	419,454	419,594
Other	5,078	6,041
Sales	\$ 3,912,665	\$ 3,633,404

⁽ⁱ⁾ Prior year comparatives for 2024 have been restated to exclude discontinued operations related to the pork operations.

The following summarizes the location of non-current assets by country:

	As at December 31,	
	2025	2024
Canada	\$ 2,404,492	\$ 2,862,830
U.S.	186,339	303,349
Other	—	234
Total non-current assets⁽ⁱ⁾	\$ 2,590,831	\$ 3,166,413

⁽ⁱ⁾ Excludes financial instruments, investments designated as financial instruments, employee benefits, and deferred tax assets.

Information About Major Customers

For the year ended December 31, 2025, the Company reported sales to three customers representing 15.1%, 14.6%, and 11.5% (2024: 14.4%, 15.4%, and 11.2% - restated to exclude discontinued operations) of total sales. No other sales were made to any one customer that represented in excess of 10.0% of total sales.

26. GOVERNMENT INCENTIVES

During the year ended December 31, 2025, the Company recognized government incentives totaling \$0.8 million (2024: \$20.3 million).

During the year ended December 31, 2025, the Company recognized \$0.5 million (2024: \$15.0 million) of government incentives as a reduction in the cost of related assets. Of this amount, \$0.2 million was received from the Government of Manitoba to assist with energy efficiency initiatives, and \$0.3 million from the Government of Canada for the expansion of further processed poultry processing capacity.

During the year ended December 31, 2025, the Company recognized \$0.3 million (2024: \$5.3 million) of government incentives in earnings. Of this amount, the Company received a \$0.2 million rebate from the Government of Manitoba for energy efficiency initiatives. In addition, the Company received \$0.1 million in other incentives.

The Company currently recognizes \$5.6 million (2024: \$6.2 million) of government debt on the Consolidated Balance Sheets from the Government of Canada to assist in innovation within the agricultural sector in Canada. Refer to Note 16.

27. COMPOSITION OF THE COMPANY

Unconsolidated Structured Entity

The Company, as part of a securitization agreement, sells a portion of its receivables to an unconsolidated third-party trust.

On May 31, 2024, the Company renewed its accounts receivable securitization facility (the "Securitization Facility") extending its maturity to May 31, 2026. The maximum cash advance available to the Company under the Securitization Facility is \$150.0 million (2024: \$150.0 million). The Securitization Facility provides cash funding with a proportion of the Company's receivables being sold, provides the Company with competitively priced financing and further diversifies its funding sources. Under the Securitization Facility, the Company has sold certain of its trade accounts receivable, with very limited recourse, to an unconsolidated third-party trust financed by an international financial institution with a long-term AA- debt rating, for cash and short-term notes back to the Company. The receivables are sold at a discount to face value based on prevailing money market rates. The Company retains servicing responsibilities for these receivables.

As at December 31, 2025, trade accounts receivable being serviced under this program amounted to \$212.1 million (2024: \$129.2 million). As consideration for the sale of its trade receivables, the Company will receive cash advances of \$150.0 million (2024: \$91.2 million) and notes receivable in the amount of \$62.1 million (2024: \$38.0 million). The notes receivable are non-interest bearing and are settled on the settlement dates of the securitized accounts receivable. Due to the timing of receipts and disbursements, the Company may, from time to time, also record a receivable or payable related to the Securitization Facility. As at December 31, 2025, the Company recorded a net payable in the amount of \$54.0 million in accounts payable and accruals (2024: \$59.8 million in accounts payable and accruals).

The Company's maximum exposure to loss due to its involvement with a structured entity is equal to the current carrying value of the interest in the notes receivable due from the structured entity. The Company has not recognized any income or losses with its interest in unconsolidated structured entities for the year ended December 31, 2025 and 2024.

28. RELATED PARTY TRANSACTIONS

The Company sponsors a number of defined benefit, defined contribution and post-retirement benefit plans. During the year ended December 31, 2025, the Company contributed \$34.3 million (2024: \$31.1 million) to these plans.

Key Management Personnel are those persons having authority and responsibility for planning, directing, and controlling the activities of the Company, directly or indirectly, including any external director of the Company.

Remuneration of Key Management Personnel of the Company is comprised of the following expenses:

	2025	2024
Short-term employee benefits		
Salaries, bonuses, and fees	\$ 19,236	\$ 12,062
Company car allowances	298	374
Other benefits	383	623
Total short-term employee benefits	\$ 19,917	\$ 13,059
Severance benefits	—	1,238
Post-employment benefits	508	537
Share-based compensation	14,502	11,251
Total remuneration	\$ 34,927	\$ 26,085

During the year ended December 31, 2025, Key Management Personnel of the Company exercised 0.5 million share options (2024: 0.1 million share options) granted under the Maple Leaf Foods share option plans for an amount of \$13.0 million (2024: \$2.5 million).

Transactions with Other Related Parties

Canada Packers Inc

On October 1, 2025, the Company completed the spin-off of its pork operations resulting in a loss of control. Following the transaction, the Company's former pork operations form the operations of Canada Packers, an independent public Canadian company, listed on the TSX. The Company retained a 16% interest and significant influence over Canada Packers and entered into a supply agreement, along with other agreements with Canada Packers. These agreements serve to provide the Company with access to a stable supply of pork products used in its operations.

Although the Company holds less than 20% of the equity shares of Canada Packers the Company exercises significant influence by virtue of director presence on the board of directors of Canada Packers and material transactions through the terms of the agreements signed as part of the spin-off.

The following are the transactions, subsequent to loss of control, with Canada Packers:

	For the year ended December 31, 2025
Sales to	\$ 18,528
Purchases from	\$ 89,913
Dividends received from	\$ 1,094
Share of associate's total comprehensive income	\$ 3,862

Sales are provided to Canada Packers for ham boning services as well as brokerage, intellectual property licensing, and information services. Purchases from Canada Packers are for pork products.

The following amounts were outstanding at the reporting date:

	As at December 31, 2025
Accounts receivable	\$ 6,305
Accounts payable and accruals	\$ 3,639

Outstanding balances as at December 31, 2025 are unsecured and settlement occurs in cash. There have been no guarantees provided or received for any related party receivable or payable.

McCain Capital Inc. & McCain Financial Advisory Services

The Company's largest shareholder is McCain Capital Inc. ("MCI"). The Company has been informed that Mr. Michael H. McCain, Executive Chair of the Company, is the controlling shareholder of MCI. For the year ended December 31, 2025, the Company received services from MCI and companies directly or indirectly owned by MCI in the amount of \$0.9 million (2024: \$0.8 million), which represented the market value of these transactions with MCI. As at December 31, 2025, \$0.3 million (2024: \$0.2 million) was owed to MCI and companies directly or indirectly owned by MCI relating to these transactions.

McCain Financial Advisory Services ("MFAS") is owned by Mr. Michael H. McCain. For the year ended December 31, 2025 and 2024, the Company provided services to and received services from MFAS for a nominal amount which represented the market value of the transactions.

29. COMMITMENTS AND CONTINGENCIES

The Company has been named as a defendant in several legal actions and is subject to various risks and contingencies arising in the normal course of business. Management is of the opinion that the outcome of these uncertainties will not have a material adverse effect on the Company's financial position.

In the normal course of its operations, the Company becomes involved in various legal and regulatory actions relating to its commercial activities and relationships, construction activities, employment matters, product liabilities, and other matters. Even if the Company is not found liable for these claims, the cost of defending these actions may be material. Among the legal matters in which the Company is involved is an ongoing investigation by the Competition Bureau into the Canadian bread industry, including alleged price fixing and related securities disclosure issues. The investigation covers a time horizon that includes the period when the Company was the majority shareholder of Canada Bread Company, Limited ("Canada Bread"). The Company sold its interest in Canada Bread, which was a stand-alone public company, to Grupo Bimbo in 2014. There are also class action proceedings related to the bread pricing allegations. In Ontario, the Ontario Superior Court has determined on two occasions that the bread class action proceeding should not be certified against Maple Leaf Foods and that ruling has been upheld by the Ontario Court of Appeal. Subsequent to year end, the plaintiffs sought leave to appeal the Ontario Court of Appeal's latest ruling to the Supreme Court of Canada. In 2024, Grupo Bimbo and Canada Bread launched a stand alone claim against the Company. The Company has consistently maintained that there was no wrongdoing while it was a shareholder of Canada Bread and is mounting a strong defense in all these matters. In late 2023, the plaintiffs in the Quebec bread pricing class action filed an application to authorize a separate class action making allegations related to meat pricing in Quebec, which application was dismissed in late 2025. The final outcome of the investigation, the class actions, and the Grupo Bimbo actions or any future claims cannot be predicted with certainty or reliably estimated. Unfavourable resolution of these or other legal matters could have a material adverse effect on the Company, its financial condition and its reputation.

In the normal course of business, the Company and its subsidiaries enter into sales commitments with customers, and purchase commitments with suppliers. These commitments are for varying terms and can provide for fixed or variable prices. The Company believes that these contracts serve to reduce risk, and does not anticipate that losses will be incurred on these contracts.
